PREFACE

This volume contains a catalogue of the coins of the Mughal Emperors, or as they styled themselves on their coins Bádsháhs, of India from the time of Bábar (A. H. 932 = A. D. 1526) to the deposition of Bahádur II by the English . (A. H. 1274 = A. D. 1858).

In the period of its greatest prosperity the empire of the Mughals extended from Kábul in the North (not to mention Balkh, of which a coin of Sháhjahán bears witness to the temporary possession) to Tanjore in the South, from Tatta and Júnagarh to the seaport town of Chittagong.

A reliable index to the geographical limits of the empire in its varying fortunes is to be found in the coins, owing to the custom of issuing money from many of the most important provincial centres, as well as at the capital, and of recording on the coin the mint from which it was issued. This practice which, as we have already seen in Vol. II, was to a small extent adopted by the Sultáns of Dehlí, was developed by the Afghán Shér Sháh after he had driven Bábar's son out of India. When, sixteen years later, Humáyún and Akbar regained the throne of Dehlí, they found it convenient and politic to retain the numismatic system which they found established. The coins, therefore, form a valuable adjunct to the plentiful, but often unsatisfactory, historical records of the Mughal period.

¹ I refer to a gold coin in the cabinet of Mr. G. B. Bleazby of Allahábád, U. P., India.

During recent years the interest taken in the coins of the Mughals has received considerable impetus, partly as a result of private, partly public efforts. The publication in 1892 of the catalogue of the coins in the fine collection belonging to the British Museum may be said to have started the movement. This was followed in 1893 and 1894 by Mr. C. J. Rodgers's catalogues of the coins in the Lahor and Calcutta Museums. America, Germany, France, and Russia have seized opportunities to acquire well-known private collections, and, latterly, India herself has begun to take more systematized action to preserve her fast disappearing numismatic records. A striking proof of this is to be found in the present series of coins. Thirteen years ago the total of the Mughal coins in the cabinet of the Indian Museum stood at 863. The number now described is 2,560, and, though part of the increase is due to the transfer to the Indian Museum as a permanent loan the collection belonging to the Asiatic Society of Bengal, it is a fact that between July, 1904, and May, 1906, more than 800 coins were sent to the Calcutta Museum Cabinet, mainly as a result of the stricter working of the Treasure Trove Act.

It was therefore fully time that the existing catalogue should be replaced by one that included recent additions. The Trustees have at the same time wisely recognized that a catalogue of coins without illustrations is shorn of half its value from the numismatist's point of view. The plates illustrating this volume have been executed by the autotype process from casts skilfully taken by Mr. A. P. Ready, Electrotypist to the British Museum.

The coins have been classified, as in the volume devoted to the Sultáns of Dehlí and for the reasons there given, under the mints from which they issued, these latter being arranged in English alphabetical order. This has given rise to no practical difficulties, and I have purposely avoided an arrangement according to the Persian alphabet, in the belief that the majority of those using the volume are likely to be more readily conversant with the former than the latter.

For those to whom the chronology of the coins is of more importance than their locale, an index has been prepared, showing for each sovereign the coins issued in each year.

The side bearing the Muḥammadan profession of faith—the Kalima—has invariably been treated as the 'obverse' of the coin. Where the Kalima is absent, the 'obverse' is that side on which the Emperor's name appears, except in cases where the two legends form a couplet, and the Emperor's name is obviously in the second half of that couplet. Where neither the Kalima nor the Emperor's name is given, the side on which the mint name occurs has been shown as the 'obverse'.

In view of the abundant literature on the Mughal period, I have not thought it necessary to preface the catalogue by any historical sketch. The introduction takes the form of notes on the various mint towns recorded on the coins in the catalogue. My aim has been to let the coins illustrate themselves, how, from a small kernel—the principality of Kábul-the tree of Mughal empire grew strong enough for its branches to cast their shadow over the greater part of the Indian peninsula, till cumbrous with too much weight it fell stricken by the storms that swept round it, the spoil of Afghán and Marāthā, Sikh and Rohilla, French and English. Yet such was the prestige which lingered round the tottering monarchy that its supplanters preferred, by recording the name of the sovereign of Dehlí on their coins, to retain the semblance of suzerainty which such an issue of coinage implied. To this is due the difficulty which presents itself to any one who attempts to discriminate between the coins of the Mughal empire proper in its later stages, and those issued by the rulers of the territories which had been wrested from the Mughal. The point has been considered by Mr. Lane-Poole on p. cviii of his introduction to the British Museum Catalogue, 'Moghul Emperors.' 'We have first to determine,' he writes, 'what coins must be placed under Sháh 'Alam. Under this head are classed all those coins which bear his name, and have legible mints and consistent dates (i. e. dates in which the regnal and Hijra years are in accord). A large number of these coins were issued by one or other of the numerous quasi-independent states which sprang up all over India upon the decay of the Moghul authority; but so long as they show the Emperor's name, and so long as their dates tally with his reign, they must be classed as his coinage, though he was only a figure-head.' This method of treatment, though it does not cover every case-e.g. the coins issued by the East India Company at Murshidábád after A. H. 1178-9 = A. D. 1765 1, and has not been followed by Mr. Lane-Poole in the case of the coins of the Banáras mint (p. 244 of the British Museum Catalogue)-goes a long way towards providing a practical working plan. Except, therefore, where cogent reasons to the contrary have been found, I have classed as Mughal issues all coins down to the close of the reign of Sháh 'Álam II which bear the name of the Dehli Emperor, excluding only those which were obviously struck by the East India Company.

I desire to express my obligations to Mr. R. Burn, I.C. S., the Rev. G. P. Taylor, D.D., of Aḥmadábád, Bombay Presidency, and Dr. O. Codrington, Librarian of the Numis-

¹ See a paper by Mr. J. M. C. Johnston in the Numismatic Chronicle of 1903, Part I, p. 71.

matic Society, for the help I have received at their hands in the preparation of this volume. Mr. Burn very kindly gave up some of his scanty leisure to read through the proofs of the catalogue, and brought to my notice several points that required correction. He was also good enough to send me notes on some of the mints, which were of much assistance.

Dr. Taylor placed unreservedly at my disposal his wide experience of Mughal numismatics, and spared himself neither time nor trouble in helping me to make the introductory notes on mint towns as complete as possible.

To Dr. Codrington I am indebted for his experienced and ready aid at all times in dealing with difficult points.

For their careful composition and prompt execution of work my thanks are again due to the Staff of the Clarendon Press.

H. NELSON WRIGHT.

INTRODUCTION

NOTES ON THE MUGHAL MINT TOWNS MENTIONED IN THIS CATALOGUE

For the observations made in the following notes I have relied largely on the coins published in the British Museum Catalogue 'Moghul Emperors', and Mr. C. J. Rodgers's Catalogue of the coins in the Lahor Museum, together with those described in the present volume. I have, however, also made references to the catalogue of the fine collection made by Dr. L. White King, I.C.S. retd., which was prepared by Mr. Schulman of Amsterdam when that collection was dispersed, and to a manuscript catalogue of my private collection.

Mr. R. Burn's paper on 'Mints of the Mughal Emperors', which appeared in the Journal of the Asiatic Society of Bengal, 1904, together with some notes supplied to me during the preparation of this volume; a manuscript list of mints prepared by Dr. G. P. Taylor of Ahmadábád, showing the extent to which they are represented in some of the better known collections; Dr. Codrington's list of mint towns in his Musalmán Numismatics; and, occasionally, Mr. Leggett's Notes on the Mint Towns and Coins of the Mohamedans, have been of great assistance. Besides these, numerous publications in the Journal of the Asiatic Society of Bengal and Chronicle of the Royal Numismatic Society have been consulted.

The historical matter which the notes contain has been extracted mainly from the following publications:—

'Ain-i-Akbari, translated by Prof. Blochmann and Col. Jarrett.

The History of India by its own Historians, Elliot and Dowson.

Muntakhabu-t-tawáríkh of Al-Badáoni, translated by Mr. W. H. Lowe.

Akbar, by Col. Malleson (Rulers of India Series).

Aurangzéb, by Mr. S. Lane-Poole (Rulers of India Series).

The Fall of the Mughal Empire, by Mr. H. G. Keene.

The series of Mughal coins is such a large one that very few numismatists can hope to have either the opportunity or the means required for forming a representative collection, and the time has now come when private collectors will do most good by concentrating their attention on the coins of individual mints. A series of monographs on the lines of Dr. Taylor's 'Coins of Ahmadabad' (J. R. A. S. Bom., vol. XX, No. LVI, p. 409) would be of great assistance to students of this period, and for such work these notes will, it is hoped, prove of practical help, by illustrating the working of the mints as gleaned from the coins in some of the principal collections of Mughal coins, and by bringing together the scattered notices that have appeared from time to time in numismatic publications,

in so far as they affect the coins here catalogued.

They may also be useful in serving as a guide to the authorities of the Indian Museum by showing in what directions efforts should be made to enlarge the collection. It is much to be hoped that such efforts will be made. I cannot claim that these are any but rough notes, to be corrected as fresh coins are brought to light. references to be consulted are so numerous and scattered it is, perhaps, hardly to be expected that none have been overlooked, and, where the information from which deductions have been derived is of necessity incomplete, it would be presumptuous to hope that no errors will be discovered. If, however, the objects which I have had in view are in any measure advanced, and some incentive is given to the more systematic preservation and record of valuable but fast disappearing numismatic evidence, something will have been gained.

A mint was first established at Ágra in the reign of Bábar ÁGRA apparently in the year A. H. 936. Its issues seem to have been confined to silver and copper, the former following the Central Asian dirham in weight and form (vide L. M. C., p. 2), while the copper coins, both under Bábar and his son Humáyún, conformed to the Bahlolí standard of about 145 grains. The latter are peculiar in that they do not bear the name of the reigning sovereign. Dáru-l-khiláfat, Dáru-z-ṣarb Qil'a, and Dáru-l-amán were used as honorific epithets of the town. On the silver coins the Kalima, and the names of the first four Khalífas, appeared on the obverse, the king's name and titles on the reverse.

Sher Sháh remodelled the coinage, issuing rupees of 180 grains and copper dáms of 330 grains, and the mint was worked freely during the Súri interregnum. Silver coins are known of Akbar's earliest years (L. M. C., p. 53), following the Súri standard of weight, but the issue of gold appears not to have started till A. H. 971. The weight of the gold muhar of this time averaged 168 grains with a maximum of 170 grains. In the British Museum (B. M. C., No. 23) is a five-muhar piece of A. H. 971 of the Ágra mint that weighs 838 grains. The silver coins weigh a little heavier, and Abú-l-fazl gives the weight of Akbar's rupee as 11½ mashas or 178-25 grains. Between 970 and 980 Akbar spent much of his time at Ágra, and the fort, which took eight years to build, still remains as a monument of this period.

In A.H. 981 appeared the rare Mihrábí gold muhar, struck at 'Baldat', (the town of) 'Agra' (No. 70), but the shape was evidently not found suitable, for it does not appear again except in an issue of the forty-ninth year (B. M. C., No. 168), also from the Agra mint.

After Akbar moved his head quarters to Fathpur Sikri, coins of Agra appeared with less regularity, and few, if any, specimens are known with dates between A.H. 988 and 1005. By this time Akbar had promulgated his Iláhí religion and era, and the gold and silver coins (which are by no means common) bear on their obverse the formula الله اكبر جل جلاله which has led some to wonder whether the الله was not meant to precede the الله اله العربية المواطقة المواطقة

In copper Akbar's earlier Agra issues were of the Súrí type known as dáms, but inscribed fulús. In A.H. 1009 (R.Y. 44) appeared the tanka (L. M. C., p. 97) with its half-piece, and two years later these made way for the four, two, and one tanki pieces. These were current at the close of the reign.

Under Jahángír the Ágra mint resumed its activity, and from it issued some of the finest specimens of the Mughal coinage. On some of Jahángír's earliest issues the Kalima was reintroduced, but as

ÁGRA a general rule the inscriptions were in the form of rhyming couplets. The weight of the muhar and rupee was also changed, some specimens weighing as much as 220-5 grains (L. M. C., No. 20, P. 131). The old standard was, however, reverted to in the sixth year of the reign, and only one or two heavy coins are known of later date.

A specimen of a five-muhar piece of the Agra mint, dated A. H. 1028, and weighing 843 grains, is preserved in the British Museum (No. 305, B. M. C.). In A. H. 1028 also appeared the wellknown series of coins, bearing on their reverse the sign of the zodiac corresponding to the month in which the coin was struck. Of these, in gold, the Indian Museum possesses thirteen (Nos. 570-82) with eight signs, issued between 1028 and 1032, and in silver three (Nos. 603-5), with the signs of Taurus, Gemini, and Cancer; but I regard only two of these latter as above suspicion.

The following five couplets are inscribed on gold and silver coins

of Agra in this Catalogue.

AR No. 588 (1014-1) R No. 589 (1015-2)

روی زر را ساخت نورانی برنگ مهر وماه شاه نور الدين جهانگير ابن اكبر بادشاه

'Sháh Núru-d-dín Jahángír, son of Akbar Bádsháh, illumined the face of the coins (money) with the colour of the sun (gold) and the moon (silver),'

a poetical way of saying that he struck gold and silver coins.

ی زر زیور	ت در آگره رو	ياد
شاہ اکبر	جهانگير شاه	از

'The face of money received beauty at Agra through Jahangir Shah, (son of) Akbar Sháh.'

No. 571 (1028-14) Taurus

سكة أكرة داد زينت زر از جهانگير شاه شاه اكبر

'The stamp of Ágra gave decoration to money through Jahángír Sháh, (son of) Shah Akbar.'

To these may be added the couplet on the rupees which bear the name of Jahángír's queen Núrjahán—Nos. 811-13:

بمحکم شاه جهانگیر یافت صد زیور زنام نور جهان بادشاه بیگم زر

By order of Shah Jahangir money gained a hundred beauties from the name of Núrjahán, his queen."

The Museum possesses two only of the copper issues of Agra, viz. the 'rawane' and the heavy 'fulus'. It will be noticed that one of these is struck on a Súrí dám (No. 828). The 'ráij' is wanting.

In A. H. 1038, during the second year of Shahjahan's reign, the name of Agra was altered to Akbarábád (No. 889 and B. M. C., No. 583), the honorific epithet (Dáru-l-khiláfat) and the name of the Persian month being at first retained. These, however, were replaced in the same year by an uncommon type in which the names of the first four khalífas and their attributes are recorded above and below the Kalima (No. 890). Between 1039 and 1043 the type changes

AGRA frequently. On the obverse the Kalima is enclosed first in a circle, then in a sixfoil area. In 1041 the area becomes square, in 1042 circular again and then diamond-shaped, till finally in 1043 a dotted square area is adopted. On the reverse the king's name and titles are written in lines across the face of the coin till 1043 when the obverse design of an area with margin is introduced. After 1039 the mint name is to be found on the reverse, before that on the obverse.

On the gold coins the areas are lozenge-shaped after 1043 and these Akbarábád muhars are perhaps the commonest of the earlier Mughal gold issues.

The collection contains only one example of a Nisár (largesse money) of this mint and that an imperfect specimen-No. 908.

The copper coinage is also meagrely represented by one coin,

a 'fulús' weighing 37 grains.

In the struggle for the throne between Shahjahan's sons Agra appears to have been effectively occupied by Shah Shuj'a, for coins were struck in his name from the Agra mint (B. M. C., No. 690) during A. H. 1068, but there is no specimen in the present collection, nor does the Museum possess any gold coin of Aurangzeb of Agra mintage. The earliest coin of this reign is of 1071 (R.Y. 3). On the obverse is a square area inscribed مثاه عالم كير بادشاه غازى with and the date in the margin. ابو المظفر سحى الدين محمد اورنگزيب بهادر The reverse contains the mint name also in a square area, while in the margin appears the formula used consistently by Aurangzéb and his successors to express their regnal year, viz.: منة جاوس ميمنت مانوس or 'year of the reign of tranquil prosperity'.

This type remained unchanged till the twenty-ninth year of Aurangzeb's reign, when it gave place to the type usually associated with this monarch, the obverse containing the following couplet :-

'Shah Aurangzeb 'Alamgir struck coin in the world like the shining moon,'

while on the reverse appear the regnal year and mint name. From this time also Akbarabad went by the name of it the permanent seat of the Khalifate.'

The catalogue contains only one copper coin of this mint which can be ascribed to Aurangzeb. It is dated the eighth year, and weighs 213 grains (No. 1646). It does not, however, bear Aurangzéb's name. Under Sháh 'Álam Bahádur Sháh the honorific epithet of the mint was altered to all , and this epithet was also employed

by Jahandar and Farrukh-siyar, the latter reverting to in AGRA the fifth year of his reign (see B. M. C., No. 924).

The remaining history of the mint calls for little comment. Coins bearing the usual inscriptions were issued from it in the name of each king down to Shah 'Alam II, and one or more specimens of each reign are to be found in the catalogue. Even the puppet king Sháhjahán III, raised to the throne by Gházíu-d-dín, seems to have issued money from Akbarábád (No. 2263), but the attribution of this coin is somewhat uncertain. In the troublous times of Shah 'Alam II Agra was successively in the hands of the Jats, Marathas, and Imperial troops. Eventually it was taken by Sindhia and held for him by his French generals until the victorious progress of Lord Lake in 1803 (A. H. 1218) left Hindústán at the mercy of the British. Meanwhile the mint continued to send out coins in the name of Shah 'Alam, but there appears to have been a break between 1180 and 1198. In the latter year coins again appeared bearing on them the distinctive mark of a fish. In 1219, when the mint must have been in British possession, the legend on the obverse was slightly altered from . but the fish , سكه صاحب قراني زد زتائيد الله to سكه زد بر هفت كشور از فضل الله mark was retained. Of this type a coin of 1220, the year before Shah 'Alam's death, is the latest that I can find (B. M. C., No. 1132), the coin described on p. 246 of the Lahor Museum Catalogue evidently being, as suggested by Mr. C. J. Rodgers, of doubtful authenticity.

On the whole the Akbarábád (Ágra) mint is well represented by its coins in the Indian Museum cabinet, the most noticeable defect being the absence of any gold coins of Aurangzéb, Sháh 'Álam I, and the last three emperors in whose reigns the mint was working. There is also a lamentable paucity of silver coins of the smaller values.

The coinage of the Aḥmadábád mint has been admirably dealt with by Dr. G. P. Taylor in his article in the J. R. A. S. Bom., vol. XX, No. LVI, pp. 409-447, and in a note on 'Akbar's copper coins of Aḥmadábád' in the J. A. S. B., 1904, Num. Supp. IV, art. 26.

Aḥmadábád was founded in A.D. 1411 (A.H. 814) by Aḥmad Sháh I, sovereign of the independent kingdom of Gujarát in Western India, and became the capital of that principality. The connexion of the Mughals with Gujarát began in the reign of Humáyún who, after overrunning Málwá, proceeded to invade Gujarát and drove the reigning sovereign Bahádur Sháh to seek protection from the Portuguese. Copper coins were struck by the invader at Chámpánír (L.M.C., p. 12) in A.H. 942, but there is none in the present collection.

As a Mughal mint the history of Ahmadábád starts in A. H. 980, when Gujarát was annexed by Akbar, and No. 76 of this catalogue is a specimen of the first gold coins issued in Akbar's name. No. 77 is another coin of the same year, but on it Ahmadábád is called 'Daru-l-khilafat'. The latter type only is noticed in Dr. Taylor's paper, but he mentions a rupee of 980 very similar to No. 76. The type changed both for gold and silver in 981 and again in 982, Ahmadábád now being known as 'Dáru-s-saltanat'. Five years later, in 987, Akbar introduced a square coinage (Nos. 82 and 114), the Kalima on the obverse being in a diamond for gold, a square for silver, issues, the four sides of which are formed by elongating some of the letters of the marginal legends. No gold coins of Akbar seem to have issued from the Ahmadábád mint after 987, but this square type continued in silver till A. H. 1000. In 1000 and 1001 while the orthodox inscriptions remained the Hijra date was replaced by the Iláhí year (No. 127), and the epithet 'Dáru-s-saltanat' was dropped; but some time during the latter year the Ilahi coins, with the Akbari creed on the obverse and the date, month, and mint on the reverse, made their appearance, square at first, but changing to round in the course of the thirty-ninth year. Another variation

occurred in A. H. 1010—Akbar's forty-seventh year—when for eight AHMAD-months a more ornate type of coin was issued (Nos. 152-3). ÁBÁD

In copper, as in the other metals, the coins struck immediately after the conquest (Nos. 347 and 348) were soon discontinued, and in 982 appeared a type of 'fulús' which was not superseded till the thirty-eighth year. Nos. 356 and 357 are examples of this type, but the Iláhí date is unfortunately obliterated. The copper coinage of Ahmadábád after 987 is very poorly represented in the Indian Museum, there being no specimens of the 'tanka' issue, which in Ahmadábád, as in Ágra, was current in the forty-fourth and two successive years. Of the issues between 1009-1013, there is only one very imperfect specimen, a 'yak tankí'—No. 357 (a).

Of the gold coins struck in Ahmadábád by Akbar's successor two only are here described (583-4), and, with the possible exception of an undated zodiacal muhar in the British Museum, probably no gold coins were issued before 1028 from this mint.

Aḥmadábád was, however, one of Jahángír's principal silver mints, and from it issued in 1027 (R.Y. 13) the earlier zodiacal coins. Of these the Museum possesses ten (Nos. 627-36), with five signs—Aries, Taurus, Gemini, Cancer, and Leo. Of the remaining seven signs, two only—Scorpio and Pisces—seem to be known in silver. The signs of Cancer and Aquarius are represented on gold muhars in the Cabinet des Médailles, Paris.

The silver coins that issued from the Ahmadábád mint during the first nine months of Jahángír's reign have a distinctive character of their own, in that the king is called by the name given him at his birth—Salim. The full legend runs—

The coins are also peculiar in that the first five are dated '50', referring to the fiftieth year of Akbar's reign, while the other four give the regnal year '2'. The Salimi coins and their dates are discussed by Dr. Taylor in a note in J. A. S. B., 1904, Num. Supp. I.

They were followed by heavy rupees with the Kalima on the obverse, and to these succeeded in 1017 the still heavier coins with the couplet—

These were current for three years only, but the inscription was revived in the lighter series of coins struck between 1027 and 1033 (Nos. 621-5). The intervening period was occupied by coins bearing the names of Iláhí months except during part of 1027 (R.Y. 12), when a new type (L. M. C., p. 146) was current for a short

ÁBÁD

ARMAD- time. During the last four years of the reign, while the influence of Núrjahán was predominant, the coinage was restricted to issues bearing her name with the usual couplet (see under Agra). This collection has no examples of the copper coinage of Jahángir from the Ahmadábád mint, nor, indeed, of any of his successors except Akbar II.

Sháhjahán at once reverted to the use of the Kalima, and some of the coins of his first year bear on them the word 'Hijri' after the date, while the regnal year 1 is termed منة احد for the first time, but No. 528 in the British Museum Catalogue shows that he began to record the Iláhí months on his coins very early in his second year. This type was current till 1043. In the latter year we find the Kalima on the obverse and the king's name on the reverse enclosed in linear squares, and this type obtained till the close of the reign. At that time Murad Bakhsh was governor of the province. It is therefore natural to find the Ahmadabad mint issuing coins in the name of that claimant to the throne during 1068. From this time to the end of the dynasty the mint is very poorly represented in the present catalogue. Of gold coins there is none, of copper one, and of silver only twenty-seven-the reigns of Shah 'Alam I, Jahándár, and Ahmad exhibiting conspicuous gaps.

The silver issues of Aurangzéb bear the usual couplet associated with that sovereign, and the same may be said, mutatis mutandis, in regard to the coins of other reigns, but the single specimen of Rafi'u-d-darját's rupees (No. 1816) is of interest in that it gives Ahmadábád a new epithet-Zinatu-l-bilád, 'the beauty of towns.'

No. 2262 shows that Ahmadábád was ready to recognize the right of the pretender, Shahjahan III, to strike coins, and Bidar-Bakht, the titular emperor set up by Ghulam Qadir in 1202, was permitted to exercise a similar privilege (No. 2499).

The latest coin from this mint is No. 2511, a copper coin of Akbar II, dated 1234.

AHMAD-NAGAR

AHMADNAGAR

Lat. 19° 5'		Long. 74°	55'
	A	At	Æ
Jahangir	1	7	100
Sháhjahán	_	3	-
Aurangzéb	-	5	_
Sháh 'Alam I	-	1	

Ahmadnagar was founded early in the sixteenth century by Ahmad Shah, the first of the Nizam Shahi kings, and became the capital of that dynasty.

When Akbar had consolidated his power north of the Vindhyas, ARMAD-his thoughts turned towards the Dakhan, and in the fortieth year NAGAR of his reign he sent his son Murád in command of an invading army. Ahmadnagar was besieged but without much energy, and eventually terms were made leaving Ahmadnagar with the Nizám Sháh. In 1008 Akbar himself proceeded to the Dakhan, and Ahmadnagar was taken after a siege of four months. In Jahángír's reign the city was lost and regained. When Sháhjahán came to the throne, the fort of Ahmadnagar was all that was left to the Mughals south of Khándésh and Berár, but a more vigorous policy was pursued, and by 1637 (1047) the Nizám Sháhí kingdom had been incorporated into the Mughal empire.

Akbar struck coins at Aḥmadnagar, but only a few specimens are known. Nos. 638-43 are probably, to judge from the evidence of the *Kalima* on the obverse, specimens of a type current early in Jahángír's reign. They are, however, of the normal rupee weight, and may therefore be placed after the sixth year. The gold muhar, No. 585, is later, and both it and the rupee of 1036 are rare coins. The latter would show that Núrjahán's influence

had not penetrated to the Dakhan.

There are two types of the coins of Shahjahan, one (No. 886) giving the Iláhí month dated 1041 and the other with the usual square areas. The mint was apparently little used during the first half of Aurangzéb's reign, only one coin-of the first year-(L. M. C., p. 179) being published of that period. In 1681 (A. H. 1092), however, Aurangzéb himself took command of his Dakhan army, and coins began soon after to issue more freely from Ahmadnagar. Nos. 1165-6 of the twenty-eighth year (1095-6) may possibly be examples of the first issues, as they are peculiar in having the Hijra date on the reverse and the regnal year on the obverse. A gold coin of 1097 (B. M. C., No. 710) retains this peculiarity, but in No. 1167 of 1098 the usual practice is introduced. A'zam Sháh, during his brief struggle for the throne (A.H. 1118), struck rupees at Ahmadnagar. The latest coin in this collection from the Ahmadnagar mint is No. 1654 of Sháh 'Álam I, and copper coins both of this king and Fárrukh-siyar (year 5) were in Dr. White King's cabinet, but after this latter reign the mints of Southern India gradually disappear, a new power springing up into independence in Haidarábád under Chin Kulich Khan and his successors.

INTRODUCTION

AHSAN-ÁBÁD

AHSANÁBÁD [KULBARGA]

Lat. 17° 21'	Long. 76° 51'	
	N A	Æ
Aurangzéb (A.)	1 —	
(K.)	1 2	_
Jahándár (K.)	1 -	_

Aḥsanābād—more commonly known later as Kulbarga or Gulbarga—was the capital of the Bahmani dynasty of the Dakhan in the latter half of the fourteenth and first quarter of the fifteenth centuries. On the decay of that dynasty it became part of the 'Adil Shāhi kingdom of Bijāpūr.

It was taken by Aurangzéb for his father in 1656 (A. H. 1067), but the latter's illness delayed the final fall of the 'Adil Sháhs till 1686 (1097-8), and it was not till that year that Kulbarga passed into Mughal hands. No. 1413 (of 1098-31) was doubtless one of the first issues of the mint under the name of Kulbarga. Both gold (L. M. C., p. 179) and silver coins were issued bearing the usual inscriptions.

In the year 1115, however, it would seem that the Bahmani name of the town was temporarily revived on the coins (X No. 1120, At cabinet of Dr. White King). Kám Bakhsh issued coins both from Ahsanábád and Kulbarga (Dr. White King's collection) and a coin is known of Ahsanábád of Sháh 'Álam I (cabinet of Mr. Frámjí Jámasjí Thánawálá). The latest known coin of the mint under its name of Kulbarga is of Jahándár, and is described in this catalogue No. 1710. Its attribution, however, though probably correct, cannot be called certain.

AJMÉR

AJMÉR

Lat. 26° 27'		Long. 74°	37'
14.	A	AR	Æ
Akbar	-	Times.	6
Aurangzéb	_	8	_
Muhammad	_	1	-
Sháh 'Álam II	_	4	

Ajmér was an important place as far back as the tenth and eleventh centuries, when it was the head quarters of the Tomára dynasty. Later, in the twelfth century, it sent its representative Prithvi Rájá to oppose Muḥammad bin Sám. In the days of Akbar it had acquired special sanctity as the burial-place of the Muḥammadan saint Khwája Mu'inu-d-din Chishtí, and for the first twenty-five years of his reign Akbar seldom missed an annual visit to the shrine of the saint.

In A. H. 978 he 'laid the foundation of a fortress in the environs AJMÉR of that pure city and ordered a lofty palace to be built by the

great Amírs'.1

He had at an earlier date established a mint there and copper dáms from it were issued in 970 (L. M. C., p. 107). The earliest coin in the present collection is dated 979 (No. 358) and gives Ajmér an epithet which I have been unable to decipher. The remaining seven coins are of the ordinary type, the words 'sikka' and 'fulús' both occurring in the inscription. The coinage went on for some years after Akbar's interest in the shrine had waned, 996 being apparently

the latest year of issue.

Under Jahángír, Ajmér became a mint for gold and silver also, and from it issued the well-known gold coins portraying Jahángír seated with a wine-cup in his hand—unfortunately not represented in the present collection. Mr. Gibbs also published a zodiacal muhar (Cancer d. 1034) of this mint bearing the name of Núrjahán (Proc. J. A. S. B., January, 1883). Sháhjahán must have coined very little money at Ajmér, for only a single rupee is known (in the Lucknow Museum); but the mint was revived by Aurangzéb in or about the thirtieth year of his reign, and was working regularly up to its close (No. 1177). The issues were almost entirely rupees, gold coins from this mint being most scarce. The obverse contains the usual inscription. On the reverse Ajmér is called 'Dáru-l-khair'—the abode of well-being. This epithet is retained to the end of the series, but in the reign of Sháh 'Alam I the title Mustaqirru-l-khiláfat is also applied to the city.

Although coins are known to have been struck at Ajmér in nearly every succeeding reign, the only kings represented in the present collection after Aurangzéb are Muḥammad Sháh and Sháh 'Alam II.

AKBAR-

AKBAR-

Akbarnagar is the modern Rájmahal in Bengal. It was founded NAGAR by Mán Singh in the fortieth year of Akbar's reign (Blochmann's 'Ain-i-Akbari, p. 340), and was used in that reign as a mint both for silver and copper, the Lucknow Museum possessing a rupee of the fiftieth year. But it was during the three following reigns that the mint was most active. There are no examples in this catalogue of the heavy Kalima and 'couplet' coins, which were issued in Jahángír's first three years (see L. M. C. and B. M. C.), but the normal weight coins of 1019 and 1020 exhibit the following rare couplet:-

'King Núru-d-dín Jahángír, son of Akbar Sháh, struck coin in Akbarnagar, the court of the king of heaven.'

The remaining coins of this reign are of the usual Iláhí type. Under Sháhjahán are to be found the regular types—the non-Iláhi rupees of the first year, followed by the Iláhí rupees from the second to the seventh year, and the 'square areas' type from that year to the end of the reign. These are all represented in the catalogue.

Of Aurangzeb there are no less than one gold and thirty-four silver coins. The gold issues of the twelfth year (cf. B. M. C., No. 706) had the king's name in a square area on the obverse, and the mint and date in a square on the reverse, but in the thirteenth year the type was changed, and we get (No. 1121) the king's titles in lines on the obverse with Aurangzéb's ordinary reverse.

On the rupees the obverse legend is the one usually found on the gold coins of Aurangzeb (بدر taking the place of بدر) until the forty-second year, when ucomes into the couplet. A further peculiarity is that both the Hijra date and regnal year are recorded on the reverse up to the forty-sixth year (1114). The British Museum Catalogue describes (B. M. C., No. 742 (a)) a rare two-anna piece of this mint.

After Aurangzéb the issues from Akbarnagar become scarce, but the Museum possesses examples of the rupees of Shah 'Alam I, Muhammad, Ahmad, and 'Alamgir II. The latest of these bears the date 1167-ahd, and is of the first year of 'Alamgir II.

AKBAR-PUR

AKBARPÚR [TÁNDA]

Lat. 26° 26′ Long. 82° 32′ R

There are but three coins-all copper-of this rare mint in the collection here catalogued. From two of these it is possible from the

inscription to identify the mint town with the Akbarpur near Tanda AKBARin the Faizabad district of Oudh. The ناصر الدنيا و الدين on the PUR reverse of these recalls the same title on the silver coins of the neighbouring town of Jaunpur. Whether No. 364 was struck at the same mint town it is difficult to say. I can trace no notice of the Akbarpur of Oudh in the chronicles of the Akbari period. Where Akbarpur is mentioned, reference is to the place on the Narbadá river, south of Ujjain, at the crossing of the Great Dakhan Road. In the 'Khulásatu-t-tawárikh' (India of Aurangzéb, by Sirkár, p. 18) mention is made of an Akbarpur at the junction of the Chambal with the Jamna-the birthplace of Raja Birbal, and there is an Akbarpur of some pretensions in the modern district of Cawnpore. In the Lahor Museum are two rupees of Akbar dated 971 and 972, which, from the half-deciphered reading on L. M. C., p. 56, appear to have been struck at Akbarpúr Tánda. There is also a rupee of Akbarpur of the reign of Jahandar in the cabinet of Mr. G. B. Bleazby of Allahábád.

AKHTARNAGAR AWADH. See AWADH.

'ALAMGÍRPÚR

ÁLAM-GÍRPÚR

Lat. 15° 32'	Long.	78° 11'	
	\boldsymbol{X}	AR	Æ
Aurangzéb	name.	10	-
Shah 'Alam I	_	2	-

'Álamgírpúr of the coins has hitherto been regarded to be the town of that name near Karnúl (Qamarnagar) in the Dakhan, but Mr. R. Burn informs me that Bhílsa, which was a mint town of Sháhjahán, was renamed 'Álamgírpúr. There is, however, this difficulty in attributing the coins of 'Álamgírpúr to Bhílsa—that Dr. White King's cabinet contained a coin of the Bhílsa mint dated year 21 (1089) of Aurangzéb, whereas No. 1233 of this catalogue, which is of the 'Álamgírpúr mint, is dated 1076. It does not seem likely that a mint renamed after the reigning king would revert to the use of its old name on its coins during that king's lifetime.

No. 1233, which is the earliest coin of 'Alamgirpur hitherto published, has the mint name at the top of the reverse. This type obtained till 1095, in which year the mint name first appears at the bottom of the reverse. After 1095 the mint seems to have worked regularly till the close of Shah 'Alam I's reign. Coins of the latter king are uncommon.

ALLAH-ÁBÁD

ALLAHÁBÁD

Lat. 25° 26'	Long.	81° 55′	
	A	Æ	Æ
Akbar	_	5	2
Jahángír	-	-	-
Shábjahán	-	1	_
Aurangzéb	1	1	_
Farrukh-siyar	_	1	_
Muhammad		3	_
Ahmad	1	2	
'Alamgir II	_	3	
Shah 'Alam II	_	4	_

Allahábád, the ancient Prayág, lies at the confluence of Jamna and the Ganges, and is the present head quarters of the Local Government of the province of Ágra. Its connexion with the Mughals, as a town of importance, dates from A. H. 982. To quote from Badáoní (Lowe's translation, Bibliotheca Indica, 1884, p. 179): 'On the 23rd of the month Ṣafar the Emperor encamped at Payág, which is commonly called Illáhábás... He laid the foundation of a great building and left the name of that city Illáhábád.'

The fort which Akbar built is still the most prominent landmark in Allahábád.

In Akbar's thirty-third year, however (Nos. 367-8), the coins still retained the old name الهابات—regarding the derivation of which Mr. R. Burn, I.C.S., has a note in J. A. S. B., 1904, Part I, No. 2. The rupees of this reign are peculiar in that the inscriptions on the obverse and reverse form a couplet—one of the few known on Akbar's coins, viz.

It has been thought that these rupees may have been struck by Jahángír, who in 1008 rebelled against his father and, assuming the title of king, struck coins in his own name (Blochmann's 'Ain-i-Akbarí, p. xxv, and E.D., vol. VI, pp. 99, 205). Rupees are, however, known of the fortieth year (1003-4), and the following passage from Badáoní (Lowe's translation, Bibliotheca Indica, p. 345) seems to fix the date of first issue of these coins as A. H. 991:

'The year after sending Mirzá Khán and the army of Málwá to Gujarát, the Emperor started from Ágra in a boat on a pleasure expedition to Iláhábád . . . and it was determined that thenceforth

that place (Allahábád) should be the Capital. And they struck ALLAHa new coinage, and Sharif Sarmadi wrote this verse for the coin: ÁBÁD

"Ever may it current be
Like the gold of sun and moon
From east to west of the world
The coinage of Allahábád."

It is possible that the coins of this type without date may be the issues between 991 and 1003. After Akbar, coins of this mint are rare, and there is none of Jahángír in this collection. Of Sháhjahán, too, there is only one specimen, a rupee of the 'square areas' type, dated 1043, but the 'Iláhí' coins of 1039-43 are represented in the British Museum (B. M. C., 606), and the 'Hijrí' issues in the cabinet of Mr. Longworth Dames (Num. Chron., 1902,

p. 275). Dr. White King had a copper coin from this mint.

Of Aurangzéb there is a gold muhar of 1099-31 of the usual type, and a scarce rupee in which the mint is given as the town of Allahábád' (No. 1243). A silver coin of Sháh 'Álam I from the cabinet of Major Vost, I.M.S., has been published by Mr. Burn (J. A. S. B., 1904, Pt. I, No. 2), and I am, on further consideration, inclined to the opinion that No. 2327 is also a coin of this king. The legend on the obverse is similar to that on No. 1665, and the dot over the منافع منافع شميع be part of the date, which might then be read 1120. The rupee of Farrukh-siyar catalogued here under No. 1743 appears to be a solitary specimen of the coins of this reign, and the absence of a solitary specimen of the coins of this reign, and the absence of muhammad, appears to be a solitary specimen of the coins of this coin is noticeable. The Museum also has examples of rupees of Muhammad, Aḥmad, 'Alamgír II and Sháh 'Alam II, and a muhar of Aḥmad Sháh. These all bear the usual inscriptions of their reigns.

ALWAR

ALWAR

Lat, 27° 34′ Long. 76° 36′

A A A A

Akbar — 2

Alwar was first used as a Muḥammadan mint by Sher Shah Sur—for copper only. Akbar also had a mint there in his early years, the two dams in this collection being dated 967 and 968, and the specimen in the Lahor Museum 972. He also issued rupees from the Alwar mint, but only two or three specimens are known. No coins of Alwar are known of any other Mughal Emperor.

XXX

AMÍR-KOT

AMÍRKOT

Lat. 25° 21′ Long. 69° 46′

Akbar — 2

The above two dáms of Akbar are the only published specimens of coins from this mint town, which is identified by Dr. Codrington in his Musalmán Numismatics as Amarkot in Sind, Akbar's birth-place. The coins are dated 979 and 989, and the mint has the prefix of Qaşba—town.

ÁNWALA

ÁNWALA [ÁONLA]

Lat. 28° 16′ Long. 79° 12′ Sháh 'Álam II — R A Æ Sháh 'Álam II — 1 —

Ánwala is only found as a mint town in the early years of the reign of Sháh 'Álam II (No. 2331 and L. M. C., p. 225). It is a town of Rohilkhand (in the present district of Badáyún (Budáon)). In the reign of Muhammad Sháh it was the head quarters of the first of the Rohilla chiefs, 'Alí Muhammad. No. 2331 must have been struck just after the battle of Pánípat, in 1761, when the Rohilla Najíb Khán was at the head of affairs in Dehlí.

In 1774, Anwala passed with the rest of Robilkhand into the hands of the Nawab of Oudh, and in 1801 became British territory.

ARKÁT

ARKÁT

Arkát (Arcot) as a mint is mainly connected with the East India Company, and the French 'Compagnie des Indes'. As an Imperial mint of the Mughals its issues were limited, and I have been obliged to exclude many of the Arkát coins in Mr. Rodgers's catalogue as not coming within the category of Mughal issues. The mint appears to have been established in the reign of Farrukh-siyar—the earliest known coins being of 1129 (cabinet of Dr. Taylor). The coin on I. M. C., p. 54 (7497), is, in my opinion, of Súrat, not Arkát.

By Muhammad the East India Company were given permission to coin rupees in imitation of the Mughal issues. This was in 1742 A.D.

= A.H. 1154-5. Possibly Nos. 1885 (a) and (b), dated 1158, may represent some of the first—but not very successful—attempts at coinage by the East India Company under this concession. The coins of Ahmad in the I.M.C. (pp. 69-70) have been excluded as non-imperial, and the only other Mughal coin of this mint is No. 2198 of the fourth year of 'Álamgir II.

ATAK BANÁRAS

ATAK BANÁ-RAS

Lat. 33° 53′ Long. 72° 15′

Akbar — R A.
Akbar — 2

'In the month of Rabi' II of this year (989) the Emperor ordered to be built on the banks of the Indus . . . a fortress which he called Atak Banáras, to distinguish it from Katak Banáras.' So writes Badáoni (Lowe's translation, Bibliotheca Indica, 1884, p. 301). A more probable reason for the name is that given by Blochmann (Ain, p. 374 n.) 'that the two frontier towns of his empire were to have similar names'. Akbar had marched north against his brother Muhammad Hakim. The king also went to Atak early in 994, and spent the greater part of the year there, leaving in Rabi' II of 995. He was again there in 997. No coins, however, appear to have been struck before the thirty-seventh year (1000-01). Dams are known of this and the following six years, and in this catalogue is a specimen of the forty-eighth year (No. 374). There are no coins of later date in this catalogue, but the Lucknow Museum has a rupee of Aurangzéb of Atak Banáras—the attribution of which is however doubtful-and a rupee is also known of Muhammad Shah of Atak (L. M.C., p. 215) dated 1158 (1745), i.e. in the period between the invasions of Nádir Sháh and Ahmad Khán Durrání.

AURANGÁBÁD [KHUJISTA BUNYÁD]

AURANG-

Lat. 19°	53'	Lor	ng. 75° 20′	
		A	AR	Æ
Aurangzéb (A	1.)	2	7	_
(1	(.)	4	7	-
Shah 'Alam I (H	(.)	1	1	_
Jahándár (K	(.)	_	2	-
Farrukh-siyar (I	K.)		1	_

Aurangábád was the name given by Aurangzéb to a town founded by him during his father's reign near the site of the village of Kharkí, 5 kos SE. of Daulatábád. Under Jahángír

AURANG- the town had been called Fathábád (Blochmann's 'Ain-i-Akbart, ÁBÁD p. 491 n.).

No. 1123 of the Catalogue dated 1070 is apparently the earliest coin known of the mint, which issued both gold and silver. Up to 1088 (B. M. C., No. 753) the mint name was put at the top of the reverse. By 1093 (Nos. 1248 and 1124) the type had altered. From 1100 the town is known on its coins solely by its honorific epithet 'Khujista Bunyád'—of auspicious foundation—there being two types of Aurangzéb's issues (Nos. 1406 and 1407).

The mint is represented by coins of the three following emperors. Rupees are also known of Muḥammad Sháh, Aḥmad Sháh, and

'Alamgir II (cabinet of Dr. Taylor).

AUSÁ

AUSÁ

Coins of this Dakhan mint are very scarce. None are known earlier than the reign of Sháh 'Álam I, or later than 'Álamgír II of whom one or two rupees exist in private collections. Ausá is in the Bídar district.

AWADH

AWADH [AKHTARNAGAR]

Lat. 26° 4	8'	Long. 82°	12'
	A	AR	Æ
Akbar	_	-	3
Muhammad	1	1	_

Awadh, the ancient Ayodhya, was in Akbar's time the head quarters of a súba, and has given its name to the province now known as Oudh. A mint for copper coinage existed in Súrí times, but neither then nor under Akbar does it seem to have been extensively used. Only a few coins of Akbar are known, and those of the early years. The specimens in the Museum are in poor condition, but a comparison with better specimens in other cabinets leaves no doubt as to their attribution. No. 552 may possibly also be from the Awadh mint. The name is always preceded by the epithet district. The mint reappears only once again in the Mughal series—in the reign of Muhammad Sháh—when it is called on the coins Akhtarnagar Awadh. The gold muhar (No. 1838) seems to be the first published example of the gold coinage of this mint.

'AZÍMÁBÁD. See PATNA.

BAHRÁICH

BAH-RÁICH

Lat. 27° 34′ Long. 81° 36′

X

Akbar —

Akbar — 4

Bahráich, which gives its name to a district in Oudh of the present day, was a copper mint of Akbar. It was an important mart for the trade between India and Nepál, and doubtless the policy of having a local mint was dictated by the necessity for a supply of copper coinage for mercantile transactions. The mint seems to have been moved after 980 to Dogáon, a village a little to the north in the same district. No other king, as far as is known, coined money at Bahráich.

BAIRÁTA

BAIRÁTA

Lat. 27°	27']	Long. 76°	12'
	A	At	Æ
Akbar	-	6	5
Jahángír	_	-	- 5
Sháhjahán	_	_	2

Bairáta, a town in Rájputáná in the vicinity of Alwar, had from early times been famous for its copper mines. It is mentioned in the 'Ain-i-Akbarí as also possessing an unremunerative silver mine.

It was a mint town under Akbar first for copper and later for silver also. The early dáms are rare. The Museum has a specimen of 971 (No. 382). A rupee is catalogued of 1005 (No. 169), but the majority of the silver issues are of the forty-eighth and forty-ninth year of Akbar. Bairáta was a mint for Akbar's tanka issue of the forty-fourth and following years, the full tanka weighing 632 grains (No. 383). Jahángír's copper issues are plentiful. Sháhjahán and Aurangzéb also coined in copper at Bairáta, and Mr. Burn (J. A. S. B., 1904, Pt. I, No. 2) mentions a copper coin of Farrukh-siyar in Dr. White King's cabinet from this mint. The coin does not, however, appear in the catalogue made when that collection was dispersed.

BARELT

BARÉLÍ [BAREILLY]

Lat. 28° 22'	Long.	79° 24'	
	A	Æ	Æ
Aurangzéb	_	13	_
Sháh 'Álam I	_	5	-
Jahándár	-	1	_
Farrukh-siyar	-	2	mat.
Muḥammad	-	4	_
Ahmad	_	3	_
'Alamgir II	_	7	_
Shah 'Alam II		5	2

Barélí is the principal town of Rohilkhand, now included in the Province of Agra. It first became a mint town in the reign of Aurangzeb, the earliest coin of that king hitherto known being dated A. H. 1099 (cabinet of Dr. Taylor). Of the eighteen years between 1101 and Aurangzeb's death in 1118 the Indian Museum possesses rupees of thirteen.

Gold coins are only known of Shah 'Alam I, Farrukh-siyar, and 'Alamgir II, and copper coins of Shah 'Alam II alone, but all the Mughal emperors after Aurangzeb issued rupees from the Bareli mint. On the coins of Shah 'Alam I منت عانوس ميمنت عانوس is replaced

by منة حبارك The later coins present no special features.

In the reign of Shah 'Alam II, Baréli was a town of considerable importance as the head quarters of Ḥáfiz Raḥmat Khán, the Rohilla chief, who fell at the battle of Katra in 1774 (A. H. 1188), fighting against Shuj'au-d-daula and his British allies. Rohilkhand was then made over to Oudh, and from this date few Mughal coins issued from the Baréli mint. Rupees are, however, known of the thirtieth and thirty-fifth years of Shah 'Alam (cf. L. M. C., p. 231), on which Baréli is called Asafábád-not Lutfábád as stated in the L. M. C .- probably in reference to the Nawab of Oudh of the time, Asafu-d-daula (see J. A. S. B., 1904, Pt. I, No. 2). The copper coins—Nos. 2488, 2489 are also of the thirty-fifth year of Shah 'Alam II.

British rule was introduced into Rohilkhand in 1801 (A. H. 1216), and Nos. 2340 to 2344, though bearing Shah 'Alam's date and in his name, must have issued under British authority. Baréli is on them called Qit'a-district. The obverse inscription differs from the one in use on the earlier Mughal issues, and a coin of 1210 was apparently adopted as a standard pattern, for the regnal year 37 is recorded on the reverse, irrespective of the Hijra date.

BHAKKAR

BHAK-KAR

Lat. 31° 3	7' Lo	ong. 71°	4'
	X	R	Æ
Shahjahan I	Name .	8	_
Aurangzéb	-	3	_

Bhakkar was taken by Muḥibb 'Alí Khán for Akbar in A. H. 981 after a siege of three years. It is given in Abú-l-fazl's list of mints for copper issues only, but in the Láhor Museum is a rupee of 985 which is, doubtfully, attributed to this mint, and Dr. White King had a specimen dated 986. Akbar's dáms of Bhakkar are very scarce. One was published by Mr. Oliver (J. A. S. B., 1886), but unfortunately the unit of the date was wanting. The other figures were 98.

The earliest coin in the present collection is a rupee of the reign of Sháhjahán (no coins of Jahángír are known) and was struck in A. H. 1040—third regnal year (No. 919). On the obverse of this coin the Kalima is enclosed in a circle, while No. 920, of the same Hijra date but a different regnal year, is a coin of the usual Iláhí type of Sháhjahán and on it Bhakkar is spelt Bakkar. The same double spelling occurs on coins of 1043. In this year appear three types. On the early coins the Kalima only is in a circle, the reverse inscription being in lines (B. M. C., No. 625). The next type has circular areas both on the obverse and reverse, while the later coins are of the 'square areas' type. This type obtained till the end of the reign.

Of the rare coins of Aurangzéb's early years three specimens are to be found in this catalogue. They are peculiar in having half the usual couplet, and the mint name, on the obverse and half on the reverse, the place of the formula being absent. It is also forms part of the inscription instead of the silver coins of Aurangzéb. By 1083 the usual type had been adopted (L. M. C., p. 184).

After Aurangzéb the mint must have been very little worked, the only silver coins published being of the reign of Farrukh-siyar (cabinet of Mr. G. B. Bleazby, Allahábád) and Muḥammad Sháh (L. M.C., p. 209, where the coin is assigned to Níkúsiyar), while three copper coins—of Muḥammad and Sháh 'Alam II—are known.

No gold coin of this mint has been published.

BHARAT-PÚR

BHARATPÚR

Lat. 27° 13'	Long.	. 77° 30′	
	N	Æ	Æ
Sháhjahán III	_	1	_
Sháh 'Álam II	1	1 :	- (1700)

Bharatpúr is the capital of a State in Rajputána on the borders of the Province of Ágra. The ruling chiefs are Játs, who became virtually independent in the early days of Muḥammad Sháh. On the coins the town is called Maha Indrapúr (Webb's Currencies of Rájputána, p. 127) and Braj Indrapúr. A mint seems to have been first established in the reign of Aḥmad Sháh (cabinet of Mr. Ellis now in the Lucknow Museum)—the rupee attributed to Sháhjahán II, in L. M. C., p. 208, being probably a coin of the pretender Sháhjahán III. Gold and silver coins were struck in the name of 'Álamgír II, Sháhjahán III, and Sháh 'Álam II. Up to the thirty-fourth year (1206) of the latter king Bharatpúr went under the name of Maha Indrapúr (L. M. C., p. 230). In the same regnal year, but in a. H. 1207, the name of the mint appears (No. 2345) as Braj Indrapúr (read by Webb as Burj-i-anwarpúr), but the Láhor Museum has a copper coin of the forty-seventh year giving the older name.

BHÍLSA

BHÍLSA

Bhílsa is a town in the state of Bhopál, and was a mint of Sháhjahán and Aurangzéb.

Dr. Taylor has a rupee of the eighth year of Sháhjahán, which is apparently the earliest coin known. The silver coin of Aurangzéb, dated the twenty-first year (1089), referred to by Mr. Burn in his mint list (J. A. S. B., 1904, Pt. I, No. 2) is the only specimen published of that king, but it has been suggested that the coins bearing the mint name of 'Álamgirpúr issued from this mint (see ante under 'Álamgirpúr).

BÍJÁPÚR

BÍJÁPÚR

Bíjápúr was the capital of the 'Ádil Sháhí dynasty which ruled there from A.D. 1489 to 1686 (A.H. 895 to 1097). When Sháhjahán attacked the Nizám Sháh of Ahmadnagar, Bíjápúr came to the latter's aid. Bíjápúr was itself besieged in a. d. 1633 (a. h. 1042-3), **Bíjápúr** but without success, and in 1636 (a. h. 1045-6) a peace was patched up. Hostilities, however, recommenced twenty years later, and Bídar and Kulbarga were taken, but Aurangzéb was called away by his father's illness before he could complete his conquest of the kingdom. In 1685 (1096-7), after ineffectual attempts on the part of his son Á'zam, Aurangzéb advanced in person against the 'Ádil Sháh, and at the close of 1097 Bíjápúr was finally conquered and incorporated in the Mughal Empire.

In the British Museum Catalogue (No. 763) is given a coin of Bijápúr dated 1091 (regnal year 24) which, if the reading is correct, was issued in Aurangzéb's name six years prior to the capture of Bijápúr. The earliest coin in this volume is of the thirtieth regnal year (1098), and from this date to the close of the reign both gold and silver coins were freely struck at Bijápúr, which was given the epithet of Dáru-z-zafar, the abode of victory. The reverse on the coins struck between 1100 and 1115 differs slightly from that of the earlier issues. A copper coin of this mint has been published by Mr. Rodgers (J. A. S. B., 1895, p. 171).

On Aurangzéb's death Bíjápúr came into the hands of Kám Bakhsh, who struck coins there (B. M. C., No. 853). It was also a mint of Sháh 'Álam I (Num. Chron., 1902), and of Farrukh-siyar the British Museum has a gold muhar, while Dr. White King possessed two copper 'fulús'. After Farrukh-siyar the mint disappears from the Mughal series.

BURHÁNÁBÁD

Lat. † Long. †
Akbar

BURHÁN-ÁBÁD

The identity of this mint has not been definitely fixed, and, as stated on p. 44 n., the solitary coin from it described here is possibly a coin, not of Akbar, but of the Nizám Sháh Burhán II of Aḥmadnagar. The resemblance of the Burhánábád coins to those struck at Daulatábád by Burhán Nizám has been pointed out in a note by Mr. Frámjí Jámasjí Thánawálá in J. A. S. B., 1907, Num. Supp. VII. I find on p. 401 of Blochmann's 'Ain-i-Akbarí' the following passage: 'During the siege of Aḥmadnagar (by Murád in the fortieth year) the inhabitants of Shahr-i-nau, which is called Burhánábád, asked the Imperialists for protection,' and from the context it would appear that Burhánábád was a part of, or close to, Aḥmadnagar.

The coin here catalogued is dated 1001, or two years before the siege of Aḥmadnagar by Murád, a further reason for considering the coin to be non-imperial.

BUR-HÁNPÚR

BURHÁNPÚR

Lat. 21° 18′		Long. 76° 14'	
	A	R	Æ
Akbar	1	5	-
Jahángír	1	8	_
Sháhjahán	4	11	_

Sháh 'Álam I	1	2	-
Jahándár	-	_	_
Farrukh-siyar	-	3	_
Muhammad	-	2	-
Ahmad	1	1	-
'Álamgír II	_	_	-
Sháh 'Álam II	-	2	_

Burhánpúr was in the reign of Akbar the principal town of the independent state known as Khándésh, between the Narbadá and the Tapti rivers. 'The rulers of Khandesh,' says the Akbarnama, were of the Fárúkí tribe, and the family had held rule in the country for more than 200 years.' Lying, however, so close to Málwá, it was natural that it should early feel the rising influence of the Mughal power. In A. H. 969 Burhánpúr was sacked by one of Akbar's generals. In 987 Akbar sent an army against Asír and Burhánpúr, and the ruler, Rájá 'Alí Khán, submitted and paid tribute. A dám of Akbar's fortieth year has been published in the Lahor Museum Catalogue, p. 116. If the date has been correctly read, this is the earliest known coin of the Burhánpúr mint. One would not have expected to find a Mughal mint established in Khándésh before the forty-fifth year. On Rájá 'Ali Khán's death in Akbar's forty-first year, his son Bahádur Khán broke out into revolt. In 1008 (forty-fourth year) Akbar, who was at the time at Ujjain, determined to compel submission by force. Burhánpúr was occupied, and eventually Asirgarh, Bahádur's principal fortress, was taken early in the forty-fifth year. Khandesh was then incorporated in the Mughal Empire. Mughal gold and silver coins now appear in plenty. In the Lahor Museum (L. M. C., pp. 81, 82) are two of the forty-fifth year. The earliest in this catalogue is dated 46 Iláhí, Farwardín, i.e. Ramazán 1009. On coins of the forty-eighth to fiftieth years the mint is written برهانبر instead of برهانبر. Akbar issued gold, silver, and copper coins from Burhánpúr, and the mint was retained by the Mughals to the virtual end of the dynasty. the reign of Shah 'Alam II. It is well represented in the present catalogue by 8 gold and 47 silver coins of nine emperors. No. 654 of BURthe first year of Jahángír gives a rare couplet:—

HÁNPÚR

'The king, the asylum of the faith, Sháh Núru-d-dín Jahángír, son of Akbar Bádsháh, struck coin in the city of Burhánpúr.'

This coin is of the normal weight, though heavy rupees were coined of the same type (L. M. C., p. 151). Burhánpúr seems to have issued no coins in the name of Núrjahán, the issues of Jahángír's last years being of the usual Iláhí type (L. M. C., p. 150). Jahángír also issued copper coins from Burhánpúr.

Of Sháhjahán there are examples of the Hijri (No. 930), Iláhí (931) and 'square areas' types, as well as of the rare variety in which the names of the four Khalífas make their first reappearance on the Mughal coinage after Akbar (No. 932). The 'square areas' are, at first, enclosed in plain, but later in dotted, lines. In the reverse marginal legend is included the formula خلد الله ملك. The lozenge-shaped area was also in vogue in 1040.

The issues of the early years of Aurangzéb are rare, but there are two in the Láhor Museum, on one of which (L. M. C., p. 180), Burhánpúr is called بلدة فاخر, 'the sumptuous town.' Dr. White King had a half fulús of the seventh year (1075). There would seem to have been few issues from the mint between 1075 and 1098, but from the latter date Burhánpúr coins are plentiful in silver, and there are gold muhars in the British Museum.

On Aurangzéb's death Burhánpúr recognized Á'zam as his father's heir, and issued coin in his name in 1119. In 1120 we find Sháh 'Álam I striking coin there, and the mint is now given the epithet of دار السرور, 'the abode of delight,' which is retained on the coinage to the end of the series.

Of the remaining coins from this mint there is little to be said. No. 2088 (A) is a rare coin and appears to be the only known specimen of the gold coinage of Ahmad Sháh from this mint. Nos. 2346 and 2347 are of crude execution and savour of Maráthá mintage. Gaps in the reigns of Jahándár, Rafí'u-d-darját and 'Álamgír II, and a total absence of any copper coins, tend to mar what is otherwise a representative collection of the issues of Burhánpúr.

CHHACH-RAULÍ

CHHACHRAULÍ

Lat. 30° 15′ Long. 77° 25′

Sháh 'Álam П — — 1

Only two coins of this mint have been published, both of Shah 'Alam II, and dated 1215 (1800). The second specimen was in the cabinet of Dr. White King. Why a mint was established at Chhachrauli is not obvious. In 1799 Shimbunath, the officer in charge of the Bawani Mahal, in which Chhachrauli was, had risen against the Marathas, and 'called in the Sikhs in aid of his attempts at independence', but 'was met and repulsed by a Mughal officer' (Keene's Fall of the Mughal Empire, p. 237).

CHÍNÁ-PATAN

CHÍNÁPATAN [MADRÁS]

Lat. 13° Long. 80° 15′

X R Æ

Aurangzéb — 5 —

Sháh 'Álam I — 2 —

Farrukh-siyar — 2 —

Chinapatan was the name by which Madras is known on Mughal issues. The earliest coin of the mint is a gold Nisar in the British Museum, dated 1103—thirty-fifth year of Aurangzéb, and in the same cabinet is a rupee of the same year. In this catalogue there is no coin prior to the fortieth year. The mint was used by Shah 'Alam I and Farrukh-siyar, but apparently not by Jahandar. Mr. C. J. Rodgers also assigned to this mint and to Muhammad Shah the coin numbered 7330 on p. 62 of this catalogue; but in the absence of any king's name, date, or full mint name, I have placed the coin among the unassigned.

CHÍTOR

CHITOR

Chitor was taken by Akbar from the Ráná of Mewár in A.H. 975, after a siege of four months. Dáms were issued between 999 and 1005 (Nos. 388-90), and a single silver coin of Akbar from this mint is known. I also find a reference in Mr. Burn's mint list (J. A. S. B., 1904) to a silver coin of Sháh 'Álam II in the cabinet of Mr. G. B. Bleazby of Allahábád.

¹ The original name was Chinna-patanam. The town was so named after Chinnapa, father of the Naik of Chingleput, within whose government it lay (Talboys Wheeler, Early Records of British India, p. 49 n.).

DAULATÁBÁD

Lat. 19° 57′ Long. 75° 13′ *X R E* Sháhiahán 4 3 — DAULAT-ÁBAD

Daulatábád is situated a few miles to the west of Aurangábád, and was known till the reign of Muḥammad bin Tughlaq as Déogír. It was a mint of the Nizám Sháhí dynasty of Ahmadnagar, but the only Mughal emperor who struck coins there was Sháhjahán.

'The fort of Lohgarh at Daulatábád in the Dakhan' is mentioned in the Akbarnáma as having been taken by the imperial forces in the forty-third year of Akbar, but in Jahángír's reign it was 'a stronghold of the Dakhanis', and was not finally captured till A. H. 1042. Sháhjahán coined in both gold and silver, and the inscriptions were in lozenge-shaped, square or eightfoil circular areas. Rupees are known of his first year—1037—but the early coins are scarce. His latest coins are dated 1068—thirty-second year. Aurangzéb transferred the mint to Aurangábád.

DEHLÍ Capital of the Mughal emperors, as it had been of the Pathán Sultans, it is not surprising to find that Dehli accounts for as many as one-tenth of the coins here catalogued. Every emperor is represented except Bábar, of whom no coins struck at Dehlí are published. The earliest coin is of Humáyún, dated 943, but coins of this emperor struck at this mint in the first year of his reign (937) are known (L. M. C., p. 6). Nos. 46 to 48, on which Dehli is called Hazrat Dáru-l-mulk, are specimens of Humáyún's copper issues, though they do not bear his name. Akbar's Dehlí rupees prior to 970, of which No. 180 is an example, are not common, and apparently no gold coins have been published with dates either before 972 (No. 84) or after 977. On the early rupees Akbar is styled السلطان الأعظم الخاتان الكثيم and the Kalima is in a circular area.

The mint name usually has the prefix Harrat, but on No. 87 of 977 to this is added 'Daru-l-mulk'. There was apparently no square 'Hijra' issue in 986-in fact no silver coins seem to have been struck between 985 and 993, and no gold coins after 977. In 993 we find issuing from Dehlí Akbar's first Iláhí coins, Nos. 182-3 being of the earliest month published-Amardad. The coins are square (though one or two round specimens are known), and in addition to Akbar's creed have the mint name on the obverse. This type continued till the forty-third year.

Akbar's copper issues from the Dehli mint are of several types, the Hijra coins up to 988 being 'fulús' struck at Hazrat Dehlí, and having the Hijra date in words and figures on the reverse. No. 391 of 966 seems to be the earliest published. From 988 to 1000 there occurs a break, the issues of the latter year being 'fulus' of Dehli, without any epithet and with the Ilahi year and month on the reverse.

In the forty-fourth year appeared the 'tanka' issue, probably in the second month, for the L. M.C. gives a 'fulus' of the first month of that year. Among the Dehlí coins of this period are sixteenths of the tanka.

Jahángír's gold coins of Dehlí are very scarce, and there is none described here. The L. M. C. gives two examples on pp. 124 and 128. The rupees of the early years-Kalima and 'couplet' types-are also rare, and are not represented in the cabinets of the British, Lahor, and Indian Museums. Specimens are, however, known in private collections. From 1021 the mint became more active, and coins of the usual Iláhí type were struck up to the end of the reign. No coins issued from Dehlí in the name of Núrjahán.

Jahángír's copper issues consisted of the small half ráij and 'fulús' weighing about 40 grains. Of Sháhjahán there are at least three varieties: (a) the Hijra coins of 1037-1038, not represented

here; (b) the Iláhí coins of 1038 to 1040 (Nos. 944-5); (c) the **DEHLÍ** 'Kalima in circle' type after 1040 (there is a coin in my own cabinet of this type as late as 1049 — thirteenth year). Sháhjahán also issued small 'fulús' from Dehlí (No. 1109).

In 1048 Sháhjahán 'built a city near Dehlí which he named Sháhjahánábád' (Elliot & Dowson's History of India, p. 12), and in future it is this name, with the epithet Dáru-l-khiláfat, which appears on the coins of Dehlí. On Sháhjahán's gold muhars and rupees both the Kalima on the obverse and the king's name on the reverse are in circular areas, while in the margin of the latter occurs the following couplet:—

'May the coin of Shahjahanabad be current for ever in the world in the name of the second Sahib Qiran,'

No. 859 is a gold muhar of this type and is dated the twenty-sixth year (1062-3), but rupees are known of earlier date.

Aurangzéb's gold and silver coins, the earliest of which is dated 1070 (No. 1139), all bear his couplet on the obverse with the usual reverse. The 'julús' formula was abandoned by Sháh 'Álam I on his silver issues and substituted for it, but it was reintroduced on some of Jahándár's coins, and obtained till the close of the dynasty.

Of Farrukh-siyar's coins several types occur, the arrangement of the inscription and date on the obverse being varied.

No. 1836 is a rare coin of the pretender Ibráhím, the inscription on which has been discussed on p. 216. The coins of Muḥammad and Aḥmad are monotonous in their uniformity. 'Álamgir II varied the type but attempted to put on the coin a great deal more than the surface would hold—his inscriptions are therefore fragmentary. Of Sháh 'Álam II the only coin that need be noticed here is No. 2467, dated 1221-48, whose border of roses, thistles, and shamrock leaves is an indication of the events that had taken place three years before.

No. 2498 is a coin struck in the name of Bidár-Bakht, whom Ghulám Qádir put on the throne of the Mughals in 1202 after blinding Sháh 'Álam.

After the British conquests in 1803 (1218), the rule of the Mughals was confined to the palace at Sháhjahánábád, but there they continued to exercise the royal privilege of striking coin till 1857. These pieces—both gold and silver—are of fine execution, and broad enough to contain the whole of the inscription—rare qualities

DEHLÍ

in the later Mughal series. Of these the latest in this catalogue is a rare coin of Bahádur II, dated 1255.

Apart from the weakness in copper coins after Akbar, the collection of coins from the Dehlí mint here catalogued may be considered thoroughly representative.

DOGÁON

DOGÁON

Lat. 27° 40′ Long. 81° 35′ *A*Akbar — 14

Dogáon was identified by Major Vost with the village of Dogon, 4½ miles to the north-west of Nánpára in the Bahráich district of Oudh (J. A. S. B., 1895). As remarked under 'Bahráich' (q.v.), the mint seems to have been removed from Bahráich to Dogáon to supply the copper coins required for the trade between India and Nepál. The earliest coin mentioned by Major Vost was of 986, but in the L. M. C. is a single specimen of 974, while the next earliest is No. 419 in this catalogue of 980. On the earlier issues Dogáon went by the epithet of Dáru-l-khiláfat. About 988 this was changed to Dáru-s-salám. Dáms of most years up to 1003 are known, and Major Vost has described one of 1011 and two coins of 1013. Some of the later coins have on the reverse, besides the date, the words of the later coins have on the reverse, besides the date, the words will, doubtless in reference to Akbar's new creed. In the Láhor Museum Catalogue is also a specimen of Akbar's 'tanka' issue of the forty-fourth year, on which the mint is spelt 'Adogám'.

No coins of Jahángír have been published, but Major Vost has described three of Sháhjahán.

ÉLICH-PÚB

ÉLICHPÚR

Lat. 21° 16'	+	Long. 770	33'
	A	A	Æ
Aurangzéb	-	1	_
Farrukh-siyar	-	1	, Second
Muḥammad	_	-	1
Unassigned	_	_	2

Élichpúr was the capital of the Imád Sháhí dynasty, which ruled in Berár between A. D. 1482 and 1572. Berár was then absorbed by Aḥmadnagar. The province was conquered by Akbar in his thirty-first year, Élichpúr being sacked. In Sháhjahán's time Berár was a súba of the Mughal Empire. Jahángír struck coins at Élichpúr, but the earliest coin here catalogued is of

Aurangzéb's forty-ninth year (No. 1297). Rupees are also known ÉLICH-from this mint of Sháh 'Álam I (L. M. C., p. 199), Jahándár (cabinet PÚR of Dr. Taylor), and Farrukh-siyar (No. 1758), and copper coins of Aurangzéb, Şháh 'Álam I, Muḥammad, Aḥmad, 'Álamgír II, and Sháh 'Álam II (see J. A. S. B., 1904, Pt. I, No. 2). No gold coins have been published.

'Alamgir II	-	1	-	
Sháh 'Álam II	-	1	_	

Etáwá is the head quarters of a district in the province of Ágra. A mint was established there by Aurangzéb, and a small Nişár in my own cabinet dated 1097-28 probably marks its inauguration. The earliest coin published is No. 1298 of 1098, and the Museum has a fine series of the rupees of this king, only two years out of the twenty not being represented, and many of the specimens being in unusually fine condition. In 1109—(forty-second year)—the mint, which hitherto had been written 'JU, is spelt JU, and this spelling is retained to the end. No. 1128 dated 1109 is apparently the earliest gold muhar published. The coins of Sháh 'Álam I are of the usual type, but Jahándár, in spite of his short reign, struck two varieties, on one of which occurs an unusual obverse inscription, viz.

بزد بر مه چو سکه جهاندار شه بادشاه جهان صاحب قران

The legend is clear on the coins (Nos. 1713-1715) but has very little meaning. It is not noticed in Mr. Rodgers's paper on couplets on Mughal coins in J. A. S. B., 1888. Farrukh-siyar also has two types, but the remaining coins present no special features. The latest coin of this mint is of Shah 'Alam II's twenty-second year (No. 2348).

FARRUKH-ÁBÁD

FARRUKHÁBÁD [AḤMADNAGAR]

Lat. 27° 24'	Lon		
	N	Æ	Æ
Farrukh-siyar	_	1	-
Muhammad	_	1	_
Ahmad	_	1	_
Sháh 'Álam II	2	23	_

Farrukhábád is the head quarters of a district in the province of Ágra. It was founded by Muḥammad Khán Bangash about 1714, and named after Farrukh-siyar (Elliot and Dowson's History of India, VIII, p. 48). The first coins from the mint were issued in that emperor's name. In the reign of Muḥammad Sháh Farrukhábád was annexed by the Nawáb of Oudh, but recovered in the following year by Aḥmad Khán, and after a struggle with the Maráthás left in his possession. From him comes the name of Aḥmadnagar which appears on the coins from the time of 'Alamgír II (L.M.C. and B.M.C.) in conjunction with Farrukhábád (see note by Mr. R. Burn, J. A. S. B., 1904). The earliest coin with the double name in the Indian Museum is No. 2285 of the fifteenth year of Sháh 'Alam II.

In 1777 (A. H. 1191) British troops were stationed at Fathgarh, an adjoining fort, and a British resident was posted there between 1780 and 1785.

Up to 1203 (1788) the coins followed the usual type of Sháh 'Álam II's coinage, but between that year and 1211 the regnal year 31 was retained on the reverse irrespective of the Hijra date. The type then changed again, and after 1212 the coins bear only the regnal year 39, the latest Hijra date known with this regnal year being 1220 (No. 2306). Farrukhábád passed permanently into the hands of the British in 1802 (A. H. 1217) and became one of the mint towns of the East India Company.

PATH-PÚR

FATHPUR

Fathpur, which lies a short distance west of Agra, was founded by Akbar in 976 on the site of the village of Sikri. The latter was well known as the residence of the Muhammadan saint Shaikh Salim Chishti, who exercised considerable influence over Akbar till his death in 979. After the early death of several of Akbar's children, Salim Chishti promised Akbar another son, and at his PATHhouse in 977 Jahángir was born and named Salim after the PUR Shaikh. Fathpur was completed in 979 and for some years became Akbar's head quarters. The earliest known coin from the mint which he established there is No. 433 dated 977 (probably), the obverse of which I have not been able completely to decipher. The mint, however, was not in regular working order till 985, of which year square rupees are known; of the following year specimens in gold, silver, and copper are catalogued. The first gold issues were round (No. 88), but in the same year appeared a square type (B. M. C., No. 66). These square coins were struck till 989 and from that date no more is heard of the mint until 1038-the first year of Shahjahán, of which date a solitary specimen is published in the Láhor Museum Catalogue (p. 161). Fathpur is known on all the coins except the round gold muhar of 986 and the dam of 977 as Dáru-s-saltanat.

GOBINDPÚR

GOBIND-PÚR

Lat. 23° 38′ Long. 86° 9′

A A Æ

Akbar — 4 —

This mint town has been identified with a place of this name in Chhotá Nágpúr in Bengál. No metal but copper seems to have been coined there. (It is not, however, mentioned in Abú-I-fazl's list of mints for copper coins.) The coins (Nos. 441-4) are specimens of Akbar's tanka issue and are of his forty-fifth to forty-seventh years.

In the Láhor Museum Catalogue are given four coins of the fortieth year, but it seems probable that forty-five has been mistaken for forty, for I can find no mention of the tanka in the 'Ain-i-Akbarí which was not completed till the forty-second year. To judge from the evidence of the Ágra and Ahmadábád coins, the tanka issue did not commence till the forty-fourth year.

GOKULGARH

GOKUL-GARH

Lat 28° 12′ Long. 76° 40′

X R Æ

Sháh 'Álam II — 7 —

Gokulgarh does not occur as a Mughal mint till the reign of Sháh 'Alam II. It was a town in Mewát on the borders of Bíkánír, GOKUL- within twenty-four hours' forced march from Dehli, and in the fief GARH of Najaf Quli Khán (Keene's Fall of the Mughal Empire, pp. 167-8). In 1788 (1202) the town was invested by Sháh 'Álam II and taken. Nos. 2355-6 were struck in the year of the siege, but the other five rupees here catalogued bear earlier dates from 1189. The coins from the mint read as Dingarh in L. M. C., pp. 227-9, are probably of Gokulgarh mintage.

GUL-KANDA

GULKANDA

Lat. 17° 2	3'	Long. 78°	24'
	A	Æ	Æ
Sháhjahán	lands.	4	_
Aurangzéb	-	17	-

Gulkanda—more familiar as Golconda—was from A.D. 1512 to 1687 the capital of the Qutb Sháhí dynasty, and is situated a few miles from the more modern capital of the Nizám's dominion, Haidarábád.

Under Sháhjahán the Qutb Sháhs came into collision with the Mughal and in 1045 agreed to pay tribute and permit the Khutba to be read in the Emperor's name. (E. D., VII, 51.) Aurangzéb, when governor of the Dakhan Súbas, lost no time in picking a fresh quarrel, which ended, in 1067, in Abdullah, the reigning king, consenting to strike coins in Sháhjahán's name. Peace, however, was only temporary, and the Gulkanda dynasty was eventually extinguished in A. H. 1098. Of the Shahjahan period four coins are catalogued. but only one of them has anything resembling a date, and that a very doubtful one, for it would place the coin earlier than 1045. Several rupees, however, are known of the first year of Aurangzeb, and therefore very shortly after the peace made in 1067 (No. 1335). These early rupees merely recite Aurangzeb's name and title, and have the mint name at the top of the reverse. By the third year the couplet had been adopted. The obverse of the 1071 rupees was apparently used for the next few years, and after 1076 the obverse of that year up to the eighteenth year (No. 1345) and probably longer. The latest date known of this mint is the thirty-first year of Aurangzeb (B. M. C., No. 712). The Mughal mint then appears to have been transferred to Haidarábád. No copper issues of Gulkanda have been published, and only a few specimens are known of the gold coinage.

GWÁLIÁR

GWÁ-LIÁR

Lat. 26° 13'		Long. 78° 10'	
	A	A	Æ
Akbar	_	-	1
Farrukh-siyar	-	1	_
Muhammad	-	5	_

Gwáliár (Gwáliar) was taken by Akbar in a. H. 966. It had been a mint town for silver and copper under Shér Sháh Súr, and Islám Sháh Súr spent much of his time there. In Akbar's time Gwáliár was only a mint for copper, and the final 'a' is written short on the coins.

No. 445 of 968, i.e. two years after the capture of the fortress, seems the earliest coin of the mint to be published. The Lahor Museum has a specimen of 987, and in the British Museum Catalogue is an Iláhí 'fulús' of the thirty-eighth year.

After Akbar the mint fell into disuse and was revived by Aurangzéb, of whose issues, however, only a solitary specimen seems known—in my own cabinet. Jahándár struck both gold and silver there, but only rupees are known of the later Mughals. Dr. White King published a copper coin of Sháh 'Alam II (Num. Chron., 1896), but its origin was only conjectured from the presence of a 'sword' on the reverse, a mint mark which is borne on Ujjain coins also.

HAIDARÁBÁD

HAIDAR-

Lat. 17° 22'	Long	. 78° 27′	
	A	AR	Æ
Aurangzéb		3	_
Sháh 'Álam I	_	1	_

Haidarábád was founded by one of the Qutb Sháhi dynasty of Gulkanda about 1600 a.d. As stated ante under Gulkanda, the mint of that town appears to have been transferred to Haidarábád after the thirty-first year of Aurangzéb's reign, the rupee of 1099 in the Láhor Museum (L. M. C., p. 107) being probably one of the first issues. It is called Dáru-l-jihád—the abode of religious warfare—on the coins of Aurangzéb and Kám Bakhsh (B.M. C., No. 852), and 'Farkhunda bunyád'—of auspicious foundation—in the reign of Sháh 'Álam I, and Muḥammad, the latter of whom struck both gold and silver there. Copper coins of this mint are known of Aurangzéb and Sháh 'Álam I.

HISÁR.

HIŞÁR [FÍROZA]

Hisár Fíroza was founded by Fíroz Sháh Tughlaq about A. H. 757. It was a mint town of the Súrís for copper, and of Akbar for silver also. Akbar's issues are scarce in both metals. The two specimens in this catalogue are dated 966 and 967. They have the affix Fíroza, but this is omitted from the later Iláhí 'fulús' of the thirty-seventh and thirty-eighth years (L. M. C., p. 106). I have in my own cabinet a rupee of Akbar, dated 963, and one or two others are known.

IMTI-YÁZ-GARH

IMTIYÁZGARH [ADONÍ]

Lat. 15° 38'	Long. 77° 17'		
	A	Æ	Æ
Muhammad	3	-	_
Aḥmad	-	2	-
'Álamgír II	5	2	-
Unassigned	_	2	_

The earliest appearance of Imtiyázgarh as a Mughal mint is on a dateless coin of Aurangzéb (L.M.C., p. 192), and only a solitary rupee seems to be known of Sháh 'Álam I. With Farrukh-siyar started a gold coinage on the pattern of the South Indian 'hun'—small dumpy coins weighing about 56 grains, if allowance be made for wear. These continued to be struck in the name of Muhammad and 'Álamgír II. Of the latter a half-piece weighing 25 grains is catalogued under No. 2182. Rupees are known of Ahmad Sháh and 'Álamgír II, but they bear, as a rule, no trace of a date or regnal year. The latest date for the mint is apparently 1170 (B. M. C., No. 1068).

ISLÁM-ÁBÁD

ISLÁMÁBÁD [CHITTAGONG]

Lat. 22° 21′ Long. 91° 50′

Aurangzéb — 1 —

Muḥammad 1 — —

To what mint town the above coins should be attributed is still a matter of doubt. Notes on the point are to be found in Mr. Longworth Dames's paper on Mughal coins in Num. Chron., 1902, p. 275, and Mr. Burn's mint list in J. A. S. B., 1904. Chittagong

was renamed Islámábád in 1076, on the conquest of Arakán, by ISLÁM-Sháyista Khán, and the same name had been given by the same general ÁBÁD in 1070 to the Maráthá fortress of Chákná. The name of Mathurá (near Agra) actually appears on the coins of Shah 'Alam II in conjunction with Islamabad. Aurangzeb destroyed one of the principal Hindu temples at Mathurá in 1080, and built on the site a large mosque. There would, however, seem to have been more need for a mint at Chittagong than at either Mathurá or Chákná. On the other hand the fact that coins bearing the name Islamabad alone were issued as late as in the reigns of Muhammad and Ahmad militates against Chákná being the mint town, for South Indian Mughal mints tend to disappear after Farrukh-siyar.

This catalogue supplies the earliest coin of the mint so far published - No. 1355 dated 1094 - the twenty-seventh year of Aurangzéb's reign. This was found in the Central Provinces-District Bhandara. The mint, however, is otherwise poorly represented, the only other coin being one of Muhammad.

JAHÁNGÍ	RNA	GAR [DACC	A]		JAHÁN-	
Lat. 23° 43	*	Long. 90° 24'			GÍRNA-	
******	\boldsymbol{A}	A	Æ		GAR	
Jahángír	-	11	-			
Sháhjahán	-	4	-			
Aurangzéb	-	11	_			
Sháh 'Álam I	_	2	-			
Farrukh-siyar	_	1	-			
Muḥammad	-	1	_			
Ahmad	_	4	-			
'Alamgir II	_	3	-			

Dháká (Dacca) seems to have been renamed Jahángirnagar about 1021, the seventh year of Jahangir's reign (E. D., VI. 328-30), the earliest coin being of the twelfth year 1 (No. 674). Jahángir's coins are all of the usual Iláhí type which began in 1020. There is a gold coin of the nineteenth year in the British Museum, but none of any other emperor appears to be known.

Of Sháhjahán two varieties are published, the Iláhí type current between 1038 and 1042, and the 'square areas' type from 1043 onwards.

Aurangzéb's early issues 2, also with square areas, containing on the obverse the second half of the emperor's couplet, and the Hijra date,

¹ The date on the coin attributed to the second year in L. M. C., p. 150, is admittedly uncertain.

² Dr. Taylor has a rupee dated 1071-3, which on the obverse has the ordinary couplet, but with بدر for بدر. The mint name is at the top of the reverse.

JAHÁN-GÍRNA-GAR and on the reverse جند... جارس, are scarce, and No. 1356 of 1081 is, perhaps, the first to be published. The ordinary type had been adopted by 1092 and continued to the close of the reign.

Jahángírnagar was a mint for both silver and copper in the reign

of Sháh 'Alam I.

The coins of the later emperors conform to the usual types—those of Aḥmad being described now for the first time. The mint was closed soon after 1765, and the only published coin in the name of Sháh 'Alam II is a rupee of 1183 (1769-70), which must have been struck by the East India Company (B. M. C., No. 1157).

No. 2223 of the fifth year of 'Alamgir II is the latest of the

Mughal issues from Jahángírnagar here catalogued.

JAIPÚR

JAIPÚR Lat. 26° 55'	_	ÁÍ] 75° 50'	
Muhammad	A	At 4	Æ
Ahmad	_	1	_
'Alamgir II	1	1	********
Sháh 'Álam II	1	1	

Jaipúr was founded in the reign of Muḥammad Sháh, in 1728 (1140-41), by Rájá Jai Singh, a descendant of Rájá Bihárí Mal, who had been the first Rájpút to join Akbar's court, and his better known son, Bhagwán Dás, father-in-law of Jahángír (Blochmann's 'Ain, p. 329). No. 1926 of 1153, twenty-third year of Muḥammad, seems to be the earliest coin known of the Jaipúr mint. Coins were issued in the names of all the later emperors, of the usual types. Those of Sháh 'Álam II bear the distinctive mint mark of the Jaipúr State, a 'jhár' of six sprigs (M. 110). Gold coins from this mint are here catalogued for the first time. 'Jaipúr' always has the prefix 'Sawái' on the coinage, Sawái being the title of its founder, and meaning 'raised above all other princes' (Webb's Currencies of Rájputána, p. 72). The state came under the protection of the British in 1818 during the reign of Akbar II.

JALÉR

The above coin and a rupee in the Láhor Museum (L. M. C., p. 149), also dated 1031, are the only issues of this mint that I have heard of. The reading is tentative, and I have been unable to identify the town.

^{1 &#}x27;Sawái' means literally one and a quarter—hence 'better than ordinary.'

JAMMÚN

JAMMÚN

Lat. 32° 44′ Long. 74° 55′

N R Æ

Sháh 'Álam II — 1 —

Jammún, the winter capital of the State of Kashmír, is only known as a Mughal mint on rupees of Sháh 'Álam II. The earliest specimen is a rupee of 1195, twenty-third regnal year (L. M. C., p. 228), and coins are known of the three following years, No. 2356 being of 1196. The obverse contains the simple enumeration of the king's name, and to the mint town is prefixed the epithet of Dáru-l-amán, the abode of safety.

JAUNPÚR

JAUN-PÚR

Lat. 25° 44'	L	ong. 82° 44'	
**	A	AR	Æ
Humáyún	-	-	8
Akbar	2	8	3

Jaunpur was the capital of the Sharqi dynasty, which became independent of Dehli in A. D. 1394 (A. H. 796). The last king, Husen Shah, was dethroned by Bahlol Lodi in A. H. 881 (1476 A. D.), and the latter struck copper coins at Jaunpur. Bábar and Humáyún used it as a mint between 935 and 943, and coins of Muhammad 'Ádil Súr are known of 963 and 964 (vol. II). Specimens of Bábar's silver issues are to be found in the Lahor Museum (L. M. C., pp. 2 and 3), but the earliest in this catalogue is a copper coin of Humáyún's first year (No. 49) on which Jaunpur is called Dáru z-zarb Khita mutabarrak. This type, which obtained till 943, is peculiar in not recording the emperor's name. Jaunpur remained in the possession of the Afghans for some years after Akbar's accession, and, according to the Tabaqát-i-Akbarí (E.D., V. 259), was annexed in the fourth year (966-7), but a rupee in the Lahor Museum (L. M. C., p. 54) bears, if the reading is correct, the date 965. In 974, the governor of Jaunpur broke out into open rebellion, and Akbar was obliged to go personally to Jaunpur before the rising could be quelled.

As in the case of Agra and Dehlí, the gold coinage was apparently not started till 971 or 972, No. 89 of the latter year being the earliest to be published. The obverse of the coins, both gold and silver, of this period contains the *Kalima* in a wavy pentagon, while the king's name and titles are enclosed in an oblong area with arched ends.

JAUN-PÚR Akbar is entitled ناصر الدنيا و الدين, 'defender of the world and the faith,' and Jaunpur is ordinarily termed 'Daru-l-khilafat'. The rupees are fine broad coins of bold execution.

In 986 appeared a square issue of the usual type, of which No. 203 is an example with a late date, 988. The copper issues are also of about this time (No. 449 and L. M. C., p. 115). The only coins known of Jaunpur after 988 are a gold muhar and two or three rupees of Aurangzéb.

JÚNA-GARH

JÚNAGARH

Lat. 21° 31'	Long.	. 70°	36'	
40.000	A	AR		Æ
Sháhjahán	-	3		_
Aurangzéb	13	10		_

Júnagarh is a town of Kathiáwár. The fortress was taken by Akbar in 999, but a mint was first established there by Sháhjahán, and a rupee dated 1049-13, of the 'square areas' type, seems to be the earliest issue from it (cabinet of Dr. Taylor).

The coins of the first thirty years of Aurangzéb are of an unusual type, part of the couplet on the obverse being enclosed in a square area, the remainder, with the Hijra year, in the margin, while in a similar square area on the reverse is the 'julús' formula, with the mint name and regnal year in the margin. In 1099 the type changes, and the usual pattern of rupee is found (No. 1373).

Coins are known of Sháh 'Álam I (Lucknow Museum), Farrukhsiyar, Sháhjahán II, and Muḥammad Sháh.

KÁBUL

KÁBUL

Lat. 34° 30'	I	ong, 69°	13'
	N	At	Æ
Akbar	-	2	3
Jahángír	-	ō	_
Sháhjahán	-	1	
Aurangzéb	1	1	-

Kábul had been Bábar's capital for some years before the battle of Pánipat in A.H. 932 gave to him the sovereignty of Hindustán. Akbar entrusted the government of Kábul to his brother Muhammad Hakím, and did not himself visit the place till 989, when he went to suppress an attempt to assume independence on the part of his brother. Bábar and Humáyún's coins from the Kábul mint had

been dirhams of the type and weight current in Central Asia. Kábul Akbar does not seem to have struck any silver coins at Kábul during the early part of his reign, his earliest issues being half dâms of the thirty-second year—995 (No. 452). The silver coinage does not appear till the forty-fourth year (1007), and these were almost all half rupees—presumably because they were nearest in weight to the local dirham. One or two rupees are, however, also known. No. 454 is a specimen of the rare 4-tankí issue of the forty-seventh year, of which the Láhor Museum has both a 'two-tankí' and a tankí piece. Jahángír continued the half-rupee issue, and No. 686 of his first year gives the rare if not unique couplet:—

'May the currency of the coin of Kabul in the name of Shah Salim continue for ever from the abode of the servants of the Living (God), the Ancient of days.'

This coin was published by Mr. Rodgers in the J. A. S. B., 1896, 'Rare Mughal Coins.'

In 1020 (sixth year) were issued rupees with the following couplet:-

سکه زد در شهر کابل خسرو گیتی پناه شاه نور الدین جهانگیر ابن اکبر بادشاه

'The king, the refuge of the world Shah Nuru-d-din Jahangir, son of Akbar Badshah, struck coin in the city of Kabul.'

No. 689 is a specimen of this type as late as 1024. By 1026 the usual Iláhí type had come into vogue. Jahángír also struck in copper (L. M. C., p. 158).

Of Shahjahan only specimens of the first and 'square area' type seem to have been published.

The earliest gold coin of the Kábul mint is of Aurangzéb, and is dated the fifteenth regnal year (1083). No. 1377 is a rare rupee of the fourth year, and is remarkable for the absence of the name 'Aurangzéb' from the legend. The mint name is at the top of the reverse. On coins of 1094 and subsequent years Kábul is given the epithet 'Dáru-l-mulk' (see L. M. C., p. 186), which it henceforth retained. No coins later than Aurangzéb are here catalogued, but rupees of Sháh 'Álam I and Farrukh-siyar, and a gold muhar of Rafí'u-d-darját are known: also copper coins of Aurangzéb, Jahándár, Farrukh-siyar, and Muhammad. The latest published coin of the Kábul mint is of A. H. 1138 (L. M. C., p. 216).

KÁLPÍ

KÁLPÍ [MUḤAMMADÁBÁD]

Kálpí was a mint town of the Súris both for silver and copper, and Akbar retained it as such for the first few years of his reign. His rupees, of which No. 206 is a specimen, are scarce. On the copper issues of 963 and 964 Kálpí is entitled 'Dáru-z-zarb Muḥammad-ábád', and across the reverse runs a line forming a knot in the centre. From 964-8 the coins bear the legend 'Dáru-z-zarb Khita Kálpí'. On the rupees no epithet is given. The mint after 968 appears to have been closed, but a hundred years later was reopened, rupees being known of Aḥmad (L. M. C., p. 219) and 'Álamgír II (cabinet of Dr. Taylor).

KASHMÍR [SRÍNAGAR?]

Lat. 34° 5′ Long. 74° 50′

Akbar — 1 1

Jahángír — 6 —

Sháhjahán — 1 —

Muḥammad — 2

The valley of Kashmir which had long been an independent kingdom, first under Hindú Rajas and then under Muḥammadan Sultans, was conquered by Akbar from the latter in A.H. 995. A coin **KASH**-in Akbar's name of this year is given in vol. II, p. 195. It is of the **MIR** local type current before the conquest. The earliest Mughal issue proper from the mint is the square gold coin described in L. M. C., (p. 52.)

'The capital of Kachemir,' says Bernier (Constable's edition, p. 397), 'bears the same name as its kingdom.' Beyond the coins above alluded to there are none in Akbar's name struck at 'Kashmir', but rupees and copper coins are known from the 'Srinagar' mint. Whether this Srinagar is the capital of Kashmir, under its ancient (and present) name or whether it is the capital of Garhwal is uncertain. The fact that under pre-Mughal rule Srinagar was called 'Kashmir'; the existence of the gold coin of Akbar struck at 'Kashmir'; and the uniform use of this name by subsequent emperors, point to the latter view. The name of Srinagar was restored to the capital of Kashmir by the Sikhs in 1819. Jahangir made frequent visits to Kashmir. His early issues were of the heavy type with the couplet:—

These were followed by the Ilahi variety of 1020 to the end of the reign. In the fifteenth year, and apparently in one month only, the Kashmir mint issued zodiacal rupees, a specimen of which is described under No. 696 with the following couplet:—

'Money coined in Kashmir was made world-conquering by the light of the name of Jahangir Shah, (son of) Shah Akbar.'

Of Sháhjahán only a few specimens are known of the second, or Iláhí, type—the 'square area' issue being more commonly met with. Both Sháhjahán and Jahángír struck Nisárs at Kashmir, but these rare little coins are not represented in this catalogue. Between Sháhjahán and Muḥammad only a few rupees of Aurangzéb and Sháh 'Alam I are known. Muḥammad, however, struck gold, silver, and copper, and the Láhor Museum has three rupees struck in the name of 'Alamgir II, the latest of which is dated 1174—i.e. a year after the Emperor's death. After this date Kashmir became a Durrání mint.

The coins of Shah 'Alam II of Srinagar mint (B. M. C., 1158-9) are undoubtedly issues of Tehri-Garhwal.

KATAK

KATAK

Lat. 20° 29′	L	ong. 85° 52'	
may be a few	X	At	Æ
Sháhjahán	-	1	_
Aurangzéb	-	4	-
Muhammad	_	1	_
Aḥmad	-	24	_

Katak—more familiarly written Cuttack—is one of the principal towns of Orissa. It was known in the early Mughal days as Katak Banáras.

When Akbar annexed Bengal in 982 Orissa was given to the ex-king to hold as a fief of the empire, but he soon broke out into revolt and it was only after three years of continuous fighting, in which Todar Mal played a conspicuous part, that Orissa became a Mughal province. The last stronghold of the once ruling race in India, it remained, to use the words of Sir William Hunter, 'a festering sore in the side of the Empire!' Eventually the Afgháns were crushed by Mán Singh in Akbar's thirty-seventh year (A. H. 1000). Sir W. Hunter speaks of coin being stamped in Akbar's name at this period, but the earliest coin from Katak so far published is of Jahángír's reign and is dated 1036 (in my own cabinet)—unless the suggested reading of Katak Banáras on some rudely executed dáms of Akbar (No. 454) is correct.

No. 960 is an early and very rare coin of Sháhjahán of the Iláhí type current in the third year, and there are four rupees catalogued of Aurangzeb between 1099 and 1102. In spite of their defeat by Mán Singh trouble had from time to time been created by the Afgháns, and in 1110 a final attempt to throw off the Mughal yoke on their part had to be suppressed. Farrukh-siyar and Muhammad struck coins at Katak, and No. 1931-a rupee of 1154-is one of the latest of the purely Mughal issues. From 1742-51 (1155-65) Orissa was at the mercy of the Maráthás, and in the latter year the province was made over to them by treaty. The titular governor was for six years a Mughal nominee, but in 1757 (1170-1) this farce ceased and Orissa became a Maratha province till 1803 (Hunter, vol. II, p. 31). To this period must be attributed the strange series of coins struck at Katak in the name of Ahmad Shah which are described on pp. 249-50 (Nos. 2118-34). To what the figures or symbols over the word in on the reverse refer I am unable to say. The latest coin of the Katak mint that I can find mention of is a rupee of the third year of Shah 'Alam II in the collection made by

Hunter's Oriesa, chap. VI.

KHAN-BÁYAT

Khanbayat, better known as Cambay, is a scaport of Gujarát and is situated at the head of the gulf which bears its name. Jahángír visited the town in the twelfth year of his reign, and in his 'Waq'iat' mentions that 'tankas of gold and silver, ten and twenty times heavier than the current gold muhar and rupee' were struck by his order there (E. D., VI. 354). I have not, however, heard of any such pieces being found, the first emperor of whom coins are known being Shahjahan. The earliest date for the mint seems to be A. H. 1051 (cabinet of Dr. Taylor), the attribution of a rupee of 1047 to this mint in the I.M.C., p. 33, being in my opinion untenable. All Sháhjahán's coins are of the 'square area' type. He coined in gold as well as in silver. So also did Aurangzéb. Of the later emperors, only rupees are published. On Sháhjahán's collapse Khanbayat, like the rest of Gujarat, threw in its lot with Murad Bakhsh, and the catalogue gives two varieties of that prince's issues from this mint. There is a good series of the rupees of Aurangzéb of the usual 'couplet' type, from the sixth year onwards to the forty-ninth year (1116), but after Aurangzéb, Khanbáyat is only represented by five rupees of four emperors, though coins were struck there by all except the last three; the latest is No. 2225 of the sixth year of 'Alamgir II (1172). Early in the reign of Aurangzéb the spelling of the mint name was changed from Khanbayat to Kanbayat and this latter form was retained on subsequent issues.

KHA	IRPÚR		KHAIR-
Lat. 27° 31'	Long. 68°	48'	PÚR
A	I R	Æ	
Akbar -		1	

Khairpur, a town in Sind, is only known as a mint town from a few copper pieces of Akbar—probably half tankas—of the forty-fifth and forty-seventh years. Dr. White King had two specimens of the former date. No. 462 is of the latter. Sind came into Akbar's possession in the thirty-eighth year of his reign (1001).

KHÁR-PÚR

KHÁRPÚR

	A	AR	Æ
Muhammad	-	11	-
Sháh 'Álam II	21	21	-

Korá is now a town of small importance in the district of Fathpúr in the United Provinces. In the days of Akbar it was the head quarters of a surkár in the súba of Allahábád. As a mint town of the Mughals it appears first on a rupee of Rafí'u-d-darját (B. M. C., No. 942), and a coin of Sháhjahán II is also known. The mint was active during the reign of Muhammad, and rupees of Ahmad, 'Álamgír, and Sháh 'Álam II are known. Korá was one of the districts retained by Sháh 'Álam when in 1765 he made over the administration of Bengal to the East India Company.

'Álamgír II		.5	-
Armingtt II	1	2	2

From Lahor, the capital of the Panjab, Babar received the invitation which eventually resulted in the conquest of India by the Mughals. He quickly established a mint there, and silver dirhams were issued by him and his son Humáyún. During the latter's LÁROR reign also were struck copper coins of the Bahlolí standard (145 grains) on which Láhor was termed Dáru-l-khiláfat. These do not

bear the emperor's name.

Láhor was one of the last towns to acknowledge the Súrís, and No. 18 is a dirham issued from the mint at a time when Shér Sháh was striking coin in Bengal. The only Súrí who struck coins at Láhor was Sikandar Sháh. These were rupees of the Súrí standard of 180 grains, but on his return Humáyún reverted to the dirham (L. M. C., p. 7), of which the British Museum has a specimen weighing as much as 111 grains (No. 13).

Dirhams are also known of Akbar, dated 963 (L. M. C.) and 964 (my own cabinet), the rupee issue, with the Kalima in a circle on the

obverse, starting in 965 (No. 207).

As in the case of Ágra and Dehlí, the gold coinage makes its first appearance in 971, the Kalima in the earlier issues being in a double-lined pentagon. After 976 Láhor again assumes the epithet of Dáru-l-khiláfat. In 985 were issued square rupees and muhars, and the honorific epithet was changed to Dáru-s-saltanat, an epithet which is associated with the Láhor mint to the end of the Mughal series. The earliest Iláhí rupees were apparently struck in the thirty-sixth year (999-1000), and this type obtained during the remaining years of Akbar's reign, the only variation occurring in the forty-seventh, forty-eighth, and forty-ninth years when the legends were enclosed in ornamental areas.

This collection contains several half and quarter rupees of Láhor mintage, but is deficient in the still smaller fractions of the rupee. Iláhí gold coins are also conspicuous by their absence. These latter, which are scarce, seem to have been issued first in the fortieth year,

both the full muhar and its quarter being known of this date.

Akbar's copper coinage of the Láhor mint dates from about 977 (L. M. C.), and the first type with the Hijra date in words and figures on the reverse continued till 988. Then occurs a break for ten years, the Iláhí type of fulús issuing in the same year (36) as the Iláhí rupee. Apparently no tankas were minted at Láhor, but in the forty-sixth year appeared the tankí issue, of which No. 477 is an early specimen.

Jahangir's partiality for Lahor as a residence is well shown by the fine series of rupees described on pp. 81 to 85 of the catalogue. But few of his gold coins are met with, and those chiefly of his earliest years. Between 1014 and 1016 two varieties both of gold and silver seem to have been current—the Kalima and the 'couplet' types. These were either square or round, and varied in weight from

LÁHOR 200 to 212 grains. In 1017 appeared a fine rupee, weighing as much as 220 grains, the inscription on which ran as follows:—

'May the coin of Láhor in the name of Sháh Jahángír be current in the world as long as the heavens revolve.'

During a few months, at the close of 1019 and beginning of 1020, the coins record the names of the months in which they were struck. Of these, No. 705 is an example containing the following couplet:—

'In the month of Ardibihisht the king of the age, Shah Jahangir, son of Shah Akbar, put this stamp on money in Lahor.'

The Lahor Museum has a somewhat similar coin of the month of Tir, which probably marks the close of the heavy rupee period, for in the following month Amardad (No. 706) was started the simpler type of normal weight, which obtained till the eleventh year (L. M. C., p. 143). This gave place to the rupee containing the following couplet:—

'May there ever be light on the surface of the coin of Lahor from the name of Shah Jahangir, (son of) Shah Akbar.'

This type went on with slight changes in the arrangement of the words till the end of the reign, the rupees struck in Núrjahán's name being apparently confined to the year 1034.

On Jahángír's death coin was struck at Láhor in the name of the rival claimant Dáwar Bakhsh, and in the same year from this mint issued the rare rupee of Sháhjahán described in the British Museum Catalogue under No. 578, the reverse of which gives Sháhjahán's early name Khurram—the obverse recording the date as which was, as in the case of other mints, followed in 1038 and 1039 by coins recording the Iláhí months.

In 1040 the Kalima appears in a circular area, with the mint name on the reverse, and four years later this type gave place to the usual 'square areas' which were retained till the end of the reign.

Apparently no gold coins are known of Aurangzeb from the Lahor mint, but his rupees, especially of the later years, are plentiful. No. 1415, a coin of the first year, bears the form of couplet usually found on the gold coins (taking the place of , but the ordinary

form had been adopted by 1079 (L. M. C.). Of the twenty regnal **LÁHOR** years between 1092 and 1117 every year but one (34) is represented in the cabinet of the Indian Museum. In the thirty-ninth year (1106-7) the type changes, the date appearing in the centre of the reverse instead of at the bottom, and this arrangement was maintained by subsequent emperors. The name of the mint is placed throughout at the top of the reverse.

The coins of Lahor present no special features of interest after Aurangzéb. Of Jahándár two types are catalogued, and there are two varieties also of the coins of Farrukh-siyar, while of 'Alamgir II there are two copper pieces, the solitary examples of Lahor copper coinage after Akbar. The latest rupee of the Mughal series from the Láhor mint is also of this emperor, and is dated 1172. From this time Lahor ceased to be a Mughal mint. It had already-some years previously-been ceded to Ahmad Shah Durrani, but had been left in charge of a Mughal governor, and coins continued to be struck in the name of the Mughal Emperor. In 1170 circumstances called again for the Abdali's interference, but he retired the following year, leaving his son Timur in charge of the Panjab. The latter, however, was driven from Láhor by the Maráthás, and in 1172 Ahmad Sháh appeared on the scene for the third time. When he returned to his own kingdom, after the battle of Pánípat, Láhor remained in possession of the Sikhs.

LAKHN. Lat. 26° 5	-	UCKNOW Long. 80° 5	AP .	LAKH- NAU
	N	Æ	Æ	
Akbar	_	_	7	
Sháhjahán	_	trans.	2	
Aurangzéb	-	15	_	
Sháh 'Alam I	-	3	_	
Jahándár	_	2	-	
Farrukh-siyar	-	1	_	

Lakhnau, or as it is usually written Lucknow, is the capital of Oudh. In the days of Akbar it was the head quarters of a sarkár in the sába of Awadh. Shér Sháh had already established a mint there for copper, and this was retained by Akbar, of whose 'fulús' two types are catalogued in this volume. The earlier variety was current in 966 and 967 (Nos. 478-9), and the later one from 980 to 987. On these latter coins Lakhnau is called Dáru-l-khiláfat—on the earlier ones no epithet is given.

Of Jahángir no coins are published. Sháhjahán seems to have been the first to issue silver money, and a specimen in my own LAKH-NAU cabinet with dotted square areas is dated 1055—nineteenth year of reign. No. 1110 is a remarkable coin, and is the only example of a Sháhjahání tanka that I have heard of. No. 1111 is a 'fulús' of the same reign of normal weight. Aurangzéb is represented by fifteen rupees of the usual type, dating from the nineteenth year to the end of the reign. Copper coins of this emperor have also been published by Mr. Rodgers. Rupees are known of the next six emperors, and in the British Museum Catalogue (No. 1184) is a coin ascribed to Sháh 'Álam II, but a comparison of this with Nos. 1693–5, and the obverse inscription of the Baréli and Sháhjahánábád rupees of Sháh 'Álam I shows that the British Museum specimen ought to have been assigned to the latter emperor.

After Muḥammad Lakhnau disappears from the list of Mughal mints. No gold coins of this mint have been published.

MAKHŞÚSÁBÁD. See MURSHIDÁBÁD.

MÁLPUR

MÁLPÚR

Lat. 23° 21′ Long. 73° 28′

Akbar — R R R

Málpár is only known as a mint town—for copper 1—in the reign of Akbar. Situated only some sixty miles east of Aḥmadábád, it is not surprising to find that the mint was short-lived, the dates on the coins ranging from 983 to 985.

MANDÚ

MANDÚ

Mandú was the old capital of the Málwá dynasty. In A. H. 941, when Humáyún invaded Málwá, Bahádur Sháh, who had annexed the province to Gujarát, took refuge in Mandú, and was besieged there. The fort capitulated after a short siege, and Humáyún had coins struck there in copper to commemorate his victory (No. 62). They are of the usual type of Humáyún's copper coinage, in weight about 145 grains and without any king's name. Akbar conquered Málwá in 968, but no coins seem to have been struck by him from this mint. In fact the only other Mughal coin that issued from Mandú is a gold piece (L. M. C., p. 127) dated 1026 of Jahángír, who visited the town in his eleventh year (E. D., VI, pp. 348-51).

A gold muhar, dated 984, of the Ahmadábád type, with Dáru-l-khiláfat Málpúr in the lower reverse margin, has recently been acquired by me.

MÍRATH [or 3 MÍRTHA]

MÍRATH

This mint town has hitherto been identified as Mírath (Meerut), a town near Dehlí, and now the head quarters of a district in the Province of Ágra. It seems, however, open to question whether the origin of the coins is not Mírtha—a strong fortress situated forty miles west by north from Ajmér—which was besieged by Akbar's forces in A.H. 969, and figures more frequently in the chronicles of Akbar's reign than Mírath. The only coins known of the mint are dáms of the usual Hijra type struck between the years 987 and 989.

MUHAMMADÁBÁD [BANÁRAS]

MUHAM
MAD-
ÁBÁD
BANÁ-
RAS

Lat, 25° 1	8'	Long. 83° 1'	
	N	AR	Æ
Muhammad	1	10	-
Ahmad	_	12	-
'Alamgir II	1	8	-
Sháh 'Álam II	_	67	_

The Banáras mint first appears in the reign of Muḥammad Sháh after whom the town was called Muḥammadábád. The earliest recorded dates are 1145 (No. 1958) in silver, and 1150 in gold (No. 1842a). On the former coin the mint name is at the top of the reverse, and the regnal year at the bottom. In 1146 the type was changed, 'Muḥammadábád' forming the top line and 'Banáras' the bottom line of the reverse. The issues of this mint under the Mughals are chiefly remarkable for the variety of mint marks displayed on the coins.

In the time of Akbar Banáras was the head quarters of a sarkár in the súba of Allahábád. Under the later Mughals it was included in the territory of the Nawáb Vazír of Oudh. The latter was compelled in 1765 (1178-9) to give up the whole of his territory, but the greater part of it was restored to him by the directors of the East India Company. In 1775 (1189) the new Vazír, Ásafuddaula, ceded to the British the proprietary rights in the Banáras district, but according to Hastings's Narrative of the Insurrection in the zemeendary of Banaris, Calcutta, 1782, App. 33, the mint was not taken over till 1781 (1195-6).

MUḤAM-MAD-ÁBÁD The coinage of the Banáras mint during the reign of Sháh 'Álam II is most complicated. Up to 1179, i.e. soon after the battle of Baksár in 1764, the coins were of the recognized Mughal type, and were issued with regularity.

Of the period between 1179 and 1189 few coins are known: the British Museum has specimens of 1183 and 1186, and issues of 1189 are published both of the sixteenth and seventeenth regnal year. The rupees of 1190 to 1192 record only the seventeenth regnal year on the reverse, while from 1193 up to 1221 (i.e. up to the death of Shah 'Alam) the reverse gives both the year 17 and a regnal year which corresponds to the Hijra date on the obverse. From 1222 to 1229, and apparently no later, the years given on the reverse are 17/49. The '17' has been considered to refer to the accession of Asafu-d-daula to the Nawabi of Oudh. The coins of this series invariably display a fish as a mint mark, and a fish is a device associated with the Oudh rulers. It might therefore be supposed that the series of coins bearing the regnal year 17 were struck at the Banáras mint for currency in Oudh. There is, however, another series of Banáras coins running concurrently with the 'seventeenth year' issues from 1211 to 1233. These also display a fish on the reverse, but of a different type, and the regnal year is invariably '26'. Stopping as it does just before the issues of Gházíu-d-dín Haidar, the first king of Oudh, in his own name (1234). it seems probable that this series, and not the 'seventeenth year' issue, was coined at Banáras by the East India Company for circulation in the Nawab Vazir's territory. The '17' might appropriately refer to the cession of Banáras to the British in 1775 (1189), and the 'seventeenth year' series would thus, after 1781 (1195-6), be the Company's coinage for use in their own possessions. I have, however, thought it desirable to include this issue in the present volume, partly because of the correspondence between the Hijra dates and the regnal years, and partly because the earlier coins were struck before the Company took over the Banáras mint. Apart from the difficulty of fixing the dividing line between the issues under native control and under that of the Company, it seemed preferable to catalogue the series as a whole in the same volume. The 'twenty-sixth year' series, falling entirely in the period of the Company's administration of the mint, has on that account been excluded.

MUḤAMMADABAD KALPI. See KALPI.

MULHÁRNAGAR [INDÓR]

MULHÁR-NAGAR

Lat. 22° 43′ Long. 75° 54′

X At Æ
Sháh 'Álam II — 16 —

The coins of this mint can only indirectly be termed Mughal. Mulhar Rao Holkar had established himself in a virtually independent position in Central India, while the throne of Dehli was tottering to its fall. He died in 1766, and his widow, who ruled for nearly thirty years—till 1795—transferred the capital from Maheshwar to Indór, re-naming the latter after her husband. The coins on pp. 289 to 291 of the catalogue, which represent every year from A. H. 1200 to 1213 (A. D. 1785 to 1798), must have issued during the rule of this princess and her successor, Tákují Holkar, who died in 1797. The coins bear the distinctive symbol of the Holkar State, a sun-face.

Ahmad	-	1	

Multán was at the time of the Mughal conquest the capital of an independent principality. It was conquered in 934 by the neighbouring King of Sind, but left in charge of Langar Khán, a general of the ex-chief. In Humáyún's reign it was annexed by Kámrán, who was governor of the Panjáb. Under Akbar it was the head quarters of a rúba, and a mint was established there for silver and copper, the earliest coins issuing in the thirty-seventh year (A. H. 1000). No coins have been published of Jahángír from this mint, but Sháhjahán revived the Multán coinage very early in his reign, specimens being known of his first or Hijra type dated 1038, second year.

The Iláhí coins were current for at least ten months in the second year, Khúrdád to Isfandármuz (No. 986-8), and they were succeeded in 1039, third year, by the 'Kalima' in circle' variety, with the mint on the reverse. This type remained for three years, giving place in 1042, sixth year (No. 995), to the square areas on obverse and reverse. No further changes occurred during the reign. The Multán mint does not seem to have issued gold coins till a later period.

MULTÁN No. 855 of 1064 being the earliest that I can find any trace of. The rupees of Aurangzéb's first years have the couplet associated with that emperor's gold coins, and the epithet of Dáru-l-amán is added to the mint name, which comes at the top of the reverse. By 1073 the usual type had been adopted and the epithet disappeared. A slight change occurs in the position of the regnal year in 1082 (No. 1470), but this was only temporary. Aurangzéb also issued gold and copper from Multán, and Farrukh-siyar's coins are known in all three metals. The latest Mughal issues from the mint are of Ahmad Sháh (No. 2153). After this reign Multán became a mint town of the Durrání dynasty.

MURÁD-ÁBÁD

MURÁDÁBÁD

Lat. 28° 51'	Lon	g. 78° 46	*
	A	Æ	Æ
'Alamgir II	-	1	_
Sháh 'Alam II		3	_

In the Láhor Museum Catalogue (p. 186) is described a rupee of Aurangzéb from this mint, dated 1097. This coin is apparently still unique. Dr. White King's collection included a rupee attributed to Sháh 'Álam I of the third regnal year, but without any Hijra date. Apart from these two coins the earliest issues from Murádábád are of Ahmad Sháh. In 1174 Murádábád temporarily issued coins in the name of Ahmad Sháh Durrání. On his retirement, it again became a Mughal mint town. In 1188 Murádábád was made over with the rest of Rohilkhand to the Nawáb of Oudh, but a coin is known of 1189, sixteenth year of Sháh 'Álam II (Dames, Num. Chron., 1902). It became British territory in 1216, and is now the head quarters of a district in the United Provinces of Ágra and Oudh.

MUR-SHID-ÁBÁD

MURSHIDÁBÁD [MAKHSÚSÁBÁD]

Lat. 2	4° 12′	Long. 88° 17'	
	A	Æ	Æ
Aurangzéb		I (Makhsúsábád)	_
	-	2 (Murshidábád)	_
Sháh 'Álam I	-	1	Wheels.
Farrukh-siyar	-	5	_
Sháhjahán II	_	2	_
Muhammad	1	17	_
Ahmad	_	13	_
'Alamgir II	_	7	-
Sháh 'Álam II	_	4	

Murshidábád, so named after Murshid Qulí Khán, who was Aurangzéb's Diwán of Bengál in 1701 (1112-13), and became sole

governor of the province in 1704 (1115-16), first appears as a MUR-Mughal mint under its old name Makhsusabad. It was doubtless SHID-Murshid Quli Khán who first caused the coins to be struck in the ABAD name of Aurangzéb, for the earliest date for the mint is 1115 (No. 1466). In the Lahor Museum is a coin of 1116 under the same name, but in the following year the coins bear the new name Murshidabad. The mint was active throughout the remaining Mughal period, but its issues were mainly rupees, the only emperors of whom gold coins are published being Farrukh-siyar, Muhammad, and Shah 'Alam II. The coin, however, attributed to the latter is dated 1181 (1767-8), B. M. C., No. 1185, and must therefore have been struck by the authority of the East India Company. There is a good series of the later Mughal rupees in the cabinet of the Indian Museum from Muhammad down to the fifth year of Shah 'Alam II (1178). Coins from this mint after 1765 (1178-9) have been excluded from this volume, as being issues of the East India Company.

MUŞTAFÁBÁD [RÁMPÚR]

MUȘȚAF-ÁBÁD

The Mustafábád of the Mughal coins is probably, as pointed out by Mr. Burn (J. A. S. B., 1904, 'Mints of the Mughal Emperors'), the town of Rámpúr, the head quarters of a native state in Rohilkhand. The name is given as an alias of Rámpúr in Francklin's Sháh Aulum, App. II, p. 240. The few coins which are known are dated 1184 and 1185.

MUZAFFARGARH

Lat. 30° 4′ Long. 71° 12′

X **A A**

Sháh 'Álam II — 1 —

MU-ZAFFAR-GARH

Muzaffargarh is in the Panjáb, not far from Multán. The single specimen described in this volume is of the thirty-ninth year of Sháh 'Alam II, and the Láhor Museum has a rupee of the fortieth year of the same Emperor (1212). Rupees from this mint are also known in the name of Akbar II.

NAJÍB-ÁBÁD

NAJÍBÁBÁD

Lat. 29° 37'	Lon	ng. 78° 21′	
	N	AR	Æ
'Alamgir II	-	5	_
Sháh 'Álam II	2	10	2

Najibábád, a town in the Bijnor district of the Province of Ágra, was so named after Najíb Khan Rohilla, who rose to eminence in the reign of 'Álamgir II and was Prime Minister of the Mughal Empire from 1761 to 1770. The Bijnor district had been made over to his charge by Dúndí Khán, one of the leading Rohilla chiefs, and he afterwards acquired the tract of country known as the Báwaní Mahál, of which Saháranpur was the principal town.

Najibábád was a Mughal mint town for gold, silver, and copper, and the dates on its coins range from the second year of 'Alamgir II (No. 2244) to the forty-second year (1215) of Sháh 'Alam II (B. M. C., No. 1204). It passed into the hands of the British in 1801 (1215-16), but copper coins are known struck in the name of Muhammad Akbar II as late as A. H. 1226.

NÁRNÓL

NÁRNÓL

Lat. 28°	3'	Long. 76°	10'
	A	Æ	Æ
Akbar	_	_	23
Sháhjahán	_	_	1
Aurangzéb	-	5	2

Nárnól was, under Akbar, the head quarters of a sarkár in the súba of Ágra, and was one of his principal copper mints. It had previously been an important mint town of the Súrís for both silver and copper, and a few rupees were also struck there by Akbar at the beginning of his reign.

The earliest Mughal coin is No. 491, dated 962, the year before Akbar's accession. It has been suggested that the '2' may be a mistake for '6', but in the Láhor Museum Catalogue (p. 111) are two specimens in which the date 962 is clear both in words and figures. As the Hijra dáms of Akbar do not bear his name, there is nothing inherently improbable that Nárnól should have issued coins—following the Súrí standard of weight—immediately on Humáyún's return to India, and that Akbar should have adopted for his own dáms the pattern of the Nárnól coin of 962.

The Indian Museum has a good series of Nárnól dáms from 962 NARNÓL to 999, and the Hijra type was maintained till quite late in Akbar's reign in preference to the tanka and tanki issues.

Copper coins were struck at Nárnól by Jahángír, Sháhjahán, and Aurangzéb, and the latter emperor revived the silver coinage, but apparently for a few years only, for the dates range from 1098 to 1102.

NARWAR

NARWAR

Lat. 25° 39′ Long. 77° 54′
'Álamgír II — A A Æ
1 —

Narwar, a town in Gwáliar State, first appears as a Mughal mint for silver in the reign of Muḥammad Sháh, and coins were struck there by Aḥmad, 'Álamgir II, and Sháh 'Álam II.

NUSRATÁBÁD

NUSRAT-ÁBÁD

Lat. 15° 30′ Long. 75°

X R Æ

Aurangzéb — 1 —

In his list of mint towns in Musalmán Numismatics, Dr. Codrington states that Nuṣratábád is 'in Bengal in Ghoraghar súbhah of Akbar'. In Mr. Leggett's Notes on the Mint Towns of the Mohamedans, p. 70, the mint town is identified with a fort in the Bíjápúr district. This is supported by the following extract from the Bombay Gazetteer under Dhárwár, pp. 707, 708:—

'In 1673 (A.H. 1083-4) Abdu-l-Karim Khán... was appointed governor of the Bíjápúr district or sarkár of Bankápúr with 16 parganas. The chief of these were Nuṣratábád or Dhárwár and Gudag... In 1674 Shivaji... took Dhárwár. In 1685 (1096-7) Sultán Mu'azzam, Aurangzéb's son, ... took Hubli and Dhárwár, a place of respectability and strength... From 1685 to 1753 Dhárwár was held by four commandants sent from Dehli... the last surrendered Dhárwár in 1753 to the third Peshwá.'

As the only coins that are published of this mint are of the reign of Aurangzéb, it seems probable that the identification of the mint with the present town of Dhárwár is correct.

The date on the rupee in this catalogue is 1109. The Lahor Museum has one of 1114. The mint is a rare one.

PATNA

PATNA ['AZÍMÁBÁD]

Lat. 25° 37	,	Long. 85°	12'
	A	AR	Æ
Akbar	1	2	-
Jahángír	-	27	_

Muhammad	-	14	_
Ahmad	_	6	-
'Alamgir II	_	11	-
Shábjahán III	1	4	_
Sháh 'Álam II	_	-5	-

Patna was taken by Akbar in person in A.H. 982, from Dáúd, the son of Sulaimán Kararání, King of Bengal. The latter had agreed with Muni'm Khán, seven years before, to strike coins in Akbar's name (Blochmann's 'Ain, p. 427), but none is known earlier than A.H. 983, the year after the conquest of Bengal (L.M.C., pp. 51-60). The earliest in this collection is a gold coin of 984 (No. 99), on which Patna is given the epithet of Dáru-z-zarb. In type it is similar to those struck at Ágra up to 986. No. 248 is an example of the square issue of 987. The Iláhí issues do not appear to have started till 1005 (forty-second year). Copper dáms of this mint are also known, but are rare.

Under Jahángír the mint was very active. Heavy rupees of the Kalima type were struck between 1014 and 1018 (B. M. C., No. 428), and these were followed in 1020 by the usual Iláhí issues, the latest of which is dated 1036 (No. 765). It was only in Jahángír's last year—1037—that Patna struck coins in the name of Núrjahán.

Of Sháhjahán we find the non-Iláhí type of the first year succeeded in the second year (1038) by the coins with Iláhí months up to 1042, and from that date by the 'square areas' till the close of the reign. Copper coins are known, both of Jahángír and Sháhjahán.

The Museum possesses three of the rare early coins of Aurangzéb, before the adoption of the couplet, and with the mint name at the top of the reverse. Coins after the eighth year (No. 1138) have the usual inscriptions, until 1117, when Patna was renamed 'Azimábád.

This designation is retained till the end of the series, but some issues PATNA of Farrukh-siyar and the rupees of Rafí'u-d-darját adhere to the old name.

The coins of Sháh 'Álam I are peculiar in lacking the 'julús' formula on their reverse. In Farrukh-siyar's reign the mint was given the title of and if, as seems probable, the coin of Jahándár bearing this epithet, and attributed to Patna (L. M. C., p. 200), is a coin of Akbarábád, coins of Patna or 'Azímábád, struck by Jahándár, have yet to be found. This would corroborate Mr. Irvine's remark in his paper on the 'Later Mughals', J. A. S. B., 1896, p. 208, that Jahándár never had any authority at Patna.

Of Ahmad Shah's coins there are two types (Nos. 2092-3), and in this reign occurs for the first time (No. 2095) the mint mark which serves to distinguish the later Mughal issues of 'Azimabad.

Of the rupees of 'Alamgir II the catalogue gives an almost complete series, and Sháhjahán III is represented both by gold and silver.

In 1765 (1178-9), after the battle of Baksár, the Mughal administration of Bengal was transferred to the British, but the mint continued for some years to issue coins in the name of Sháh 'Álam. Of these No. 2336 dated 1182 (R.Y. 9) must be a specimen. The British Museum has a gold rupee of the same Hijra date, but of the tenth regnal year.

Apparently the only copper coin known of the 'Azimábád mint is one of Aurangzéb dated 1118, published by Mr. C. J. Rodgers in the J. A. S. B., 1895, p. 171.

PURBANDAR

PURBAN-

Lat. 21° 37'	Long. 69° 48'		
	A	A	Æ
Aurangzéb	_	1	-
Sháh 'Alam I	_	1	_

Purbandar is a town on the west coast of Kathiáwár, and was a port of some importance in early times.

Only four coins of this mint are known—the two above, another of Shah 'Alam, and the fourth of Farrukh-siyar—all rupees. No. 1503, dated 1116, was found in the Bhandara district of the Central Provinces, vide J. A. S. B., 1904, Num. Supp. IV.

INTRODUCTION

QAMAR-NAGAR

QAMARNAGAR [KARNÚL]

Lat. 15° 50′ Long. 78° 4′

Muhammad — R Æ

Muhammad — 2 —

The only coins published of this mint are of the reign of Muḥammad Shah. The two specimens in this collection are dated A. H. 1150, the twentieth year of that king's reign.

QANAUJ

QANAUJ [SHÁHÁBÁD QANAUJ]

Qanauj was the scene of the battle between Sher Shah and Humáyún, which resulted in the latter being driven from India in A. H. 947. A fort was built by the conqueror a few miles out of Qanauj. and called after him Shergarh. The Súrís established a mint there for copper, which was retained by Akbar during the first years of his reign. On the Súrí coins the mint name appears as Qanauj, alias Shergarh. On Akbar's dams the latter name seems to have changed to Shahgarh, the 'Shah' being plain on No. 515. No coins are published of this mint after 969 till the reign of Muhammad Shah, when the double name 'Shahabad Qanauj' appears. Whether this represents another change from Sháhgarh to Sháhábád, or whether it refers to Qanauj and the adjacent town of Shahabad in the Hardoi district of Oudh, is not very clear. The former seems more probable, for I find a passage in the Tárikh-i-Hindí (E. D., VIII. 46) which speaks of the fort of Cháchandi near Sháhábád Qanauj', as if the latter were a single town with a double name.

Rupees of Ahmad Shah and 'Alamgir II are also known of this mint.

QANDA-HÁR

QANDAHÁR

Lat. 31° 37′ Long. 65° 43′

Jahángír — 26 — 7

Qandahár was finally acquired by Bábar after many vicissitudes in A.H. 929. Humáyún's brother Askari was governor of the province in 951, and it was only after much opposition that Humáyún captured Qandahár in 952. The city was taken by Sháh Tahmásp of Persia in 965, and made over to his nephew. The latter's son, finding his tenure precarious, was prevailed upon to put himself under the protection of Akbar. Thus Qandahár became Mughal again in A. H. 1003 QANDA-(Blochmann's 'Ain-i-Akbarí, p. 313), and remained so till A. H. 1032, HÁR when it was retaken by Sháh 'Abbás of Persia. In A. H. 1047 it was delivered by treachery into the hands of Sháhjahán, but after eleven years' occupation by the Mughals was again annexed by Persia. The coins accurately reflect the history of the town. Dirhams struck by Humáyún are published in the Láhor Museum Catalogue. No coins seem to have been struck by Akbar at Qandahár, and the mint was apparently not re-established till 1020, the sixth year of Jahángír, when heavy rupees of the Kalima type were issued. In 1021 and 1022 these were followed by the 'couplet' variety, but by Khárdád of the eighth year the Iláhí coins had begun to issue. These continued till 1025, the eleventh year, when a new couplet appeared on the coins:—

سكه تندهار شد دلحواه از جهانگير شاه اكبر شاه

'The coin of Qandahar was made attractive by the name of Jahangir Shah, (son of) Akbar Shah.'

Specimens of each of the regnal years up to the seventeenth are given in the catalogue, pp. 89-90. Jahángír also struck copper at Qandahár. Of Sháhjahán the British Museum has a rupee dated 1048, the year after the Mughal reoccupation, and coins of the next few years are not uncommon, the latest being of 1057, the twenty-first regnal year (No. 1038). Qandahár was retaken by Persia in the following year.

SAHÁRANPÚR

SAHÁR-ANPÚR

Lat. 29° 57′ Long. 77° 33′

X A Æ

Akbar — 7

Sháh 'Álam II — 2

Saháranpúr was in Akbar's time the head quarters of a sarkár in the súba of Dehlí. It was a mint for copper only, the dáms being of the Iláhí type and the dates ranging between the thirty-seventh and thirty-ninth years. Except for a solitary rupee of Aurangzéb, dated 1097 (in my own cabinet), no coins are published of this mint after 1002 till the reign of Sháh 'Álam II, when both silver and copper coins were struck. Saháranpúr was the principal town of the tract of country known as the Báwaní Mahál which had been acquired by Najíb Khán Rohilla and remained in his family for two generations. No. 2497 of 1215 was struck in the year preceding the British occupation of the district (1801). Saháranpúr is known on the rupees of Sháh 'Álam II as Dáru-s-sarúr,' the abode of pleasure,' an epithet also borne by Burhánpúr.

SAR-HIND

SARHIND [also SAHRIND]

Lat. 30°	38'	Long. 76° 2	7'
	N	A	Æ
Akbar	_	_	2
Aurangzéb	_	6	-
Sháh 'Álam I	-	1	-
Muhammad	-	2	_
Ahmad	_	2	_
'Alamgir II	_	1	-

Sarhind was the head quarters of a sarkár in the súba of Dehlí under Akbar. The British Museum Catalogue (No. 61) gives a gold coin of this mint, dated 984, and copper 'fulús' of the usual Hijra type are known of 987, with the epithet of 'Baldat'. The Iláhí coins of the thirty-seventh to the forty-first years are, however, more frequently met with. They are peculiar in not giving the month of issue.

No coins are published of Jahángír and Sháhjahán from this mint. The first silver coins are of the reign of Aurangzéb, the earliest date published being 1103 (No. 1504). On these coins, and on all future issues, Sarhind is written Sahrind. Rupees are known of all the succeeding emperors down to 'Álamgír II, except Sháhjahán II. The latest date for the mint seems to be 1171. After this Sarhind became Sikh territory.

SHOLÁ-PÚR

SHOLÁPÚR

Sholápúr, a town in the Dakhan, which lies between Ahmadnagar and Bíjápúr, was for many years 'the subject of contention between Nizámu-l-Mulk (of Ahmadnagar) and 'Ádil Khán (of Bíjápúr)'—E. D., VI. 416. It was occupied by the Mughals after Ahmadnagar was taken by Akbar in A. D. 1600, but was retaken in Jahángír's reign by Malik 'Ambar. Under Sháhjahán it again passed into the possession of the Mughals, but Aurangzéb seems to have been the first to establish a mint there, the earliest published date on the coins being A. H. 1081—fifteenth regnal year (No. 1146).

Aurangzéb and his successor Sháh 'Álam I struck coins in gold, silver, and copper at the Sholápúr mint. Of Jahándár no coins are published, but Dr. White King had a specimen without date of the copper coinage of Farrukh-siyar. After this reign Sholápúr ceases to be a Mughal mint.

SÍTPÚR

Lat. † Long. †

Akbar — 5 —

The identification of this mint town is uncertain. The name has been read Pesháwar and Sítápúr. The reading Sítpúr suggested by Mr. C. J. Rodgers (L. M. C., p. 86) is more probable. There is a town of this name in the Muzaffargarh district of the Panjáb. The mint was apparently working only during the forty-eighth and forty-ninth years of Akbar.

Sháhjabán III	_	1	_

Súrat, on the Gulf of Cambay, was one of the principal mint towns of the Mughal Emperors after Jahángír. The present fort was built in 947 by a slave of Sultán Mahmúd of Gujarát 'in order to resist the attacks of Europeans' (E. D., V. 347), but the city had become a place of considerable importance by the first quarter of the sixteenth century. In 980 it was besieged and taken by Akbar, and a rupee is known of Akbar's Iláhí type with the mint spelt of L. M. C., p. 70), but the attribution of this coin to the Súrat mint is not free from doubt.

Jahángír's issues are scarce, the earliest date being 1030 (No. 792). From 1033 to 1037 Súrat rupees were struck in the name of Núrjahán.

The first issues of Sháhjahán are of an unusual type, the obverse containing the Kalima and Hijra date, while on the reverse above the mint name is the legend من الله على . These were followed by coins of the Hijra type, which were issued for a longer period from Súrat than from most mints, specimens being known as late as 1041 (No. 1044). In the fourth year the Iláhí type appeared (B. M. C., No. 533), but by 1043 this had given way to the square areas on

SÚRAT obverse and reverse. This type was maintained till 1067, but on the coins of 1057 the legends are enclosed in lozenge-shaped areas. In 1067-8 the inscriptions were in circles.

In the latter year coins of two types were struck in the name of Murad Bakhsh.

Of the rupees of Aurangzéb the catalogue describes no less than eighty-nine, very few years of this long reign being unrepresented. On the earliest issues Súrat is called 'Bandar-i-Mubárak'—the blessed port—in reference to its being the port of departure for the pilgrimage to Mecca, but by the third year the epithet had been dropped (No. 1541). From that time up to 1089 the regnal year is to be found at the top of the reverse, but the coins described on pp. 180-1 of the catalogue show that slight variations were made in the arrangement of the legend during that period. In 1090 the ordinary type of reverse was adopted and continued without change to the end of the Mughal series. The obverse inscriptions of the later Súrat coins present no unusual features except in the first year of Muḥammad Sháh, when the following legend occurs:—

سكه زد در جهان باطف اله بادشاء زمان محمد شاه

'The king of the age, Muhammad Shah, struck coin in the world by the grace of God.'

It was supposed that coins of this type were issues of the claimant to the throne, Níkúsiyar, but the mistake was corrected by Mr. W. Irvine (see note to No. 2069 (a)). Rupees are known of all the later Mughal Emperors down to Sháh 'Álam II, and copper coins of all except Sháhjahán II, Ahmad, Álamgír II, and Sháh 'Álam II. Jahángír and Sháhjahán I also issued copper money from the Súrat mint, but there is not a single specimen in the collection here catalogued of the copper coinage of this city. Double rupees of Álamgír II and Sháh 'Álam II are noticed in J. A. S. B., Num. Supp. V, 1905.

When the East India Company commenced striking their own coins in Bombay they made use of the Súrat Mughal rupee as a model, but 'there arose discrepancies in the fineness which obliged the Company to have their coins restruck at Súrat. It was not till 1800 (1214) that the Bombay mint recommenced the issue of Súrat rupees, and not till 1804 (1219), the forty-sixth year of Sháh 'Alam, that a fixed coinage was established '(Lane-Poole, B. M. C., p. civ, introduction). On p. 243 of the catalogue are given coins (Nos. 2079-81) which may be the imitations above referred to.

The British Museum Catalogue gives examples of coins struck in the name of Shah 'Alam II down to the thirty-second year of his reign (A. H. 1204).

TATTA

TATTA

Lat. 24° 45'		Long. 67° 5	58'
	A	R	Æ
Akbar	_	23	-
Jahángir	_	15	_
Sháhjahán	1	14	-
Aurangzéb	_	11	_
Sháh 'Álam I	-	1	_

Tatta was the capital of the independent state of Sind, which was conquered in A. H. 929 by the Arghún family who traced their descent from Changiz Khán.

In 999 Akbar determined to annex Sind to the Mughal Empire, and the conquest was effected in his thirty-seventh year by the son of Bahram Khan.

A mint for silver coins was established at Tatta immediately after the Mughal occupation, and square rupees of the Ilahí type are known of every year from 1001 to the end of Akbar's reign. The issues of the thirty-eighth year differ slightly from those of the following years, the date in the former being to the left and in the latter to the right of the mint name.

During the first five years of Jahángír's reign the heavy rupee of the Kalima type was current, but in 1020 this gave place to the normal-weight Iláhí coin, with the inscriptions enclosed in ornamental areas. A plainer variety appeared in the fifteenth year and was retained to the end of the reign, the coins of 1037 differing slightly in the arrangement of the reverse. No coins are published from this mint in the name of Núrjahán.

The issues of Sháhjahán are peculiar in that the Iláhí type is maintained throughout the reign from 1038—second year—to 1069—thirty-third year. I have not been able to trace any published coins of Sháhjahán's first year from this mint.

The obverse of Aurangzéb's coins up to 1071 recites the king's name and titles. From 1072 the couplet type was current.

No. 1708 (a) is an interesting and very rare coin of Shah 'Alam I with the name Mu'azzam, by which he was known before he came to the throne. On the obverse is the following couplet:—

'The second Sháhjahán Sultán Mu'azzam, the Sultán, struck blessed coin in the seven climes on gold and silver (lit. the sun and the moon).'

TATTA

After Aurangzéb the coinage of the Tatta mint becomes scarce, but rupees are known of Farrukh-siyar, Sháhjahán II, and Muḥammad, and the cabinet of Mr. Ellis (now in the Lucknow Museum) contained a copper coin of the latter Emperor, dated 1141.

UJJAIN

UJJAIN	[al	so UJAIN]

	A	A	Æ
Akbar	_	1	2
Sháhjahán	-	2	2
Aurangzéb	1	1	_
Muhammad	1		_
Shah 'Alam II	and a	15	

Ujjain was one of the principal towns of the kingdom of Málwá, and after the conquest of that province by Akbar became the head quarters of a sarkár.

Humáyún had struck dirhams at Ujjain on his invasion of Málwá, and the Lahor Museum Catalogue (p. 55) gives a silver coin of Akbar (weighing 100 grains!) dated 968, the year of the annexation of the province by Akbar. Square rupees of the usual type are known of 990, and Dr. White King's cabinet included a half rupee of 987. In Akbar's forty-second and following years rupees were issued of the Iláhí type.

No. 526 is a rare specimen of Akbar's dáms, and No. 527, dated 995, of his square pieces, following in weight and form the earlier local currency. Some coins of the latter type give the name as Ujjainpúr.

I can find no publication of any coins of Jahangir from this mint, but Nos. 1084 and 1085 are rupees of Shahjahan of the Hijra type struck in his second year—1039. On these the mint name is 'Baldat Újain'. Rupees are also known of the Ilahí and 'square areas' varieties. Shahjahan's copper coinage followed Akbar's later issues in weight and shape (No. 1113).

The title 'Daru-l-fath', which is associated with Ujjain, seems to have originated with Aurangzéb, and was in use as early as 1073 (No. 1153). In this reign also the mint issued gold coins for the first time. Rupees are known of all the later Emperors except Sháhjahán II and Ahmad Sháh, and gold coins of A'zam Sháh, Sháh 'Álam I, and Muḥammad. In the reign of Ahmad Sháh, Ujjain came into the possession of Sindhia, whose capital it remained till 1810 (1225). The series of coins described on pp. 295, 296 of the

catalogue were issued during this period, and can only by courtesy UJJAIN be called Mughal coins. They all bear the same distinctive mint mark. The latest date for the mint is the forty-fourth year of Shah 'Alam II (1216-17), corresponding to A. D. 1801, when the Mughal sovereign finally came under British protection.

ÚRDÚ-I-ZAFAR-QARÍN

Akbar 2 6 16

ÚRDÚ-I-ZAFAR-QARÍN

The practice of issuing coins from a travelling camp mint was inaugurated by Bábar (L. M. C., p. 3), and was continued by Akbar and Jahángír, but the latter's camp issues are extremely scarce. The earliest coin of Akbar struck in the 'Camp associated with victory' is the gold muhar—possibly still unique—described under No. 100 of the catalogue and dated 984. A square rupee, dated 987 and struck in the 'camp'—jo only—with the Kalima enclosed in a diamond-shaped area and اخلا علي in the four marginal corners, is in my own cabinet, and another square rupee of the same date but of a different type is described in the British Museum Catalogue (No. 128). Apart from these, all Akbar's issues of 'Úrdú' mintage bear the date

Under No. 528 a coin has been catalogued of the thirty-sixth year, but too little of the unit of the date is left to make the reading certain, and it is probable that what has been read as a '6' is really a '9'.

It seems to me open to question whether all these 'alif' coins were issued in the year 1000. We know from Badáoni that with the advent of Abú-l-Fazl at the Court in 982, followed by the weekly discussions in the newly-built Ibádat Khána, Akbar's thoughts turned towards the renunciation of Islám. By 986 his ideas had crystallized, and in the year 987 Akbar publicly assumed the spiritual leadership of the nation, and coins of this year are known with the obverse legend. In 990 Badáoní writes that 'His Majesty was now convinced that the millennium of the Islámitic dispensation was drawing near. No obstacle, therefore, remained to promulgating the designs which he had planned in secret. . . . The first order which was passed was that the coinage should show the era of the millennium'.

This, taken in conjunction with the facts above mentioned regarding the dates found on the Imperial camp issues, would seem to indicate that the 'alif' coins were issued between 987 and 1000, irrespective of the actual Hijra date. When the millennium had

ť

ÚRDÚ-I-ZAFAR-QARÍN arrived, i.e. in the thirty-seventh year of the reign, the coins naturally recorded the real dates. These issues of dáms with Iláhí dates continued till the fiftieth, i.e. last, year of Akbar's reign. Two varieties of the 'Úrdú-i-zafar-qarín' coins are also known (Nos. 537, 538), without 'alif' or any other date.

ZAFAR-ÁBÁD

ZAFARÁBÁD

Dr. Codrington, in his Musalmán Numismatics, locates this mint town in the North-west Provinces, presumably referring to the town of that name near Jaunpúr, but as the dates on the coins range from 1069, the thirty-second year of Sháhjahán, to 1119, the first year of Sháh 'Álam Bahádur Sháh (L. M. C.), it seems more probable that the mint town was Bídar taken by Aurangzéb from the Bijápúr king in 1067, just before he was called to Dehlí by the illness of Sháhjahán, and renamed by him Zafarábád.

ZAFAR-NAGAR

ZAFARNAGAR

Sháhjahán — 3 —

I am not aware of the exact locality of this mint town. Dr. Codrington, in his Musalmán Numismatics, identifies it with Fathábád in the Province of Ágra. The references to the place, however, in the chronicles of Jahángír's, Sháhjahán's, and Aurangzéb's reign (see E. D., VII. pp. 37 and 315; also Blochmann's 'Ain, p. 503) seem to leave no doubt that the Zafarnagar of the coins is the town of that name in South India, south of Ahmadnagar.

A rupee of Jahángír without date from this mint is published in the Láhor Museum Catalogue (p. 134), the earliest dated coin being of the third year of Sháhjahán of the Iláhí type (No. 1086). No. 1088 is a rupee of the same emperor with square areas and dated 1043. A coin of Aurangzéb from the Láhor Museum is mentioned by Mr. Burn in his mint list (J. A. S. B., 1904).

¹ This is L.M.C., No. 13079, where so has been read as the unit of the date. The coin is, however, identical with No. 13391, and both appear to be of 986.

² I have included this in Akbar's coinage following I.M.C., p. 15. It presumably was struck in Humáyûn's reign, but is of the type associated with Akbar.

¹ This is I.M.C., No. 8927, and was considered by Mr. Rodgers to be a forgery. I have, however, seen several of the same type. Mr. Oliver (J.A.S.B., 1886, No. 1, Pl. I. 9), in describing one, has suggested Sirsa Banáras as the mint. The above reading, Katak Banáras, is tentative. The poor execution suggests a Bengal mint

A doubtful coin. The left and top marginal legends of reverse appear to be a blundered

attempt at صاحب قران ثاني. عاحب عران ثاني. This is almost certainly a coin of Multan mintage. Cf. No. 855 supra, on which the same mark occurs.

SILVER	A 1836 1	Sháh- jahánábád <i>Dáru-l-</i> <u>kh</u> iláfat	1132- aḥd	کریم محمد ابراهیم شاهان ۱۱۳۲ شاهان براغضل براغضل سکد] زد [در] جهان W. 175.	فة جها اباد دار لخلا شاء ن ضرب جلوس میمنت مانوس سنة احد

is the reading given in the British Museum Catalogus, Nos. 954-7, and in Dr. Codrington's Musalmán Numismatics the couplet is given as

Neither on No. 1836 nor in the illustrations in the B.M.C. are the words at the right of the top line distinct. The word کریم would give a better couplet:—

This reading was, I find, suggested by Mr. Delmerick in describing a silver coin of Ibrahim in J.A.S.B., 1875.

This is I.M.C., No. 9023, p. 66, where the mint is given as Akbarabad.

^{*} Coins bearing the mint name will were struck by the French Compagnie des Indes at Pondicherry and the East India Company at Madrás by permission and in the name of Muhammad Shah. It has been thought preferable to catalogue all such coins in the fourth volume.

³ This is I.M.C., No. 11860, p. 70—assigned to Ahmad Sháh. There is no crescent on the reverse, and the coin resembles in type No. 1883.

^{&#}x27;Coins of this type in gold and silver have been assigned (cf. B.M.C., Moghul Emperors, p. 197, and L.M.C., p. 209) to Nikhsiyar, a grandson of Aurangzéb, who was set up as a claimant to the Mughal throne in the troublons year 1719 a. b. (a. n. 1181). Mr. W. Irvine, however, pointed out in the Proc. A.S.B. for April, 1899, that the coins are in reality the first issues of Muhammad Sháh: quoting in support of his contention a passage from the Mirát-i-Aþmadi. From the latter it appears that on receipt of a hashullukus announcing Muhammad Sháh's accession, 'Mihr 'Ali Khán, the Deputy-Governor (of Súbah Gujarát), . . . and all the other officials having assembled, the accession was proclaimed by beat of drum, the Khutbah was recited and coin was issued with the inscription—

But after this the inscription on the coin was altered to

The chief guide to the assignation of this coin is the mint-mark, which, since the reign of Ahmad Shah, appears on all the coins of the 'Azimabad mint.

¹ This is I.M.C., No. 8511, p. 75, assigned in error to Murshidabad. The letters of are distinctly visible. The mint-mark is also that of Ahmadabad.

³ I have assigned this coin to Shah jahan III in preference to Shah jahan II on account of the inferiority in execution as compared with the coins of the latter king.

¹ This is I.M.C., No. 10841, p. 72, and has been catalogued as a coin of 'Alamgir II. It certainly resembles in type No. 2183 (supra), but the regnal year 15, which is clear, indicates that it is a coin of Shah 'Alam. Use has possibly been made of an old die for the obverse.

The attribution of Nos. 2273 and 2274 to Korá is not free from doubt. They undoubtedly are from the same mint as No. 2358 (a) below, but in that coin there are traces of letters before 1. A fuller specimen must be awaited before any reading can be accepted with confidence.

¹ This is almost certainly a coin of Shah 'Atam I, and should properly have been catalogued as 1668 (a). The date is probably 1120—see Introduction.

This is I.M.C., No. 9192, p. 76, ascribed to Akbarábád. The coins of the latter mint are, however, of quite a different type.

APPENDIX B

CHRONOLOGICAL INDEX

Note.—In this appendix the coins have been grouped chronologically under their Hijra dates. Where the Hijra date is not recorded, the coin has ordinarily been put under the earliest year with which the regnal year corresponds. E.g. coins of the 41st Ilahi year of Akbar (= A. H. 1004-5) are put under A. H. 1004, and coins of the 6th year of Alamgir II (= A. H. 1172-3) will be found under A. H. 1172. The printing of the regnal year in italics indicates that the Hijra date is not given on the coin.

Norg.—This table is taken from the British Museum Catalogue 'Sultans of Dehli', for which it was compiled by Mr. Stanley Lane-Poole from sources there quoted.

APPENDIX D

NOTE ON THE ILAHÍ ERA OF AKBAR

While at work on this catalogue my attention was attracted to a difference in the dates given by the principal authorities for the commencement of the Iláhí era, which was established by Akbar in the thirtieth year of his reign (a. H. 992 = A. D. 1584).

On p. 32 (note) of the British Museum Catalogue, 'Moghul Emperors,' Mr. Lane-Poole says, 'The Iláhí or divine epoch of Akbar . . . dates from the fifth day of Rabi' II of the year 963.'

Similarly Dr. Codrington, who followed Thomas's Prinsep's Indian Antiquities, vol. ii, p. 171, says in his Musalinan Numismatics, p. 205, 'The Tarikh Ilahi . . . began with his (Akbar's) reign on 5th Rabiu-s-sani, A.H. 963 or 19th February, 1556 A.D.'

On the other hand the table given on p. 246 of vol. v of Elliot and Dowson's 'History of India as told by its own Historians' makes the commencement of the Ilahi era to fall on the 27th Rabiu-l-akhir, 963, corresponding to the 10th or 11th March, 1556 O.S., and in a footnote it is stated that 'this table, as far as the forty-sixth year, has been drawn up from the Akharnama of Aba-l-fazl, which is the most accurate of the authorities and most consistent with itself.'

The dates given in this table for the commencement of the twenty-eighth to fiftieth years of Akbar have been adopted by Mr. Lane-Poole on p. lxii of the introduction to the British Museum Catalogue, 'Moghul Emperors.'

The question is whether the Ilahí era began on 5th Rabí II, 963, or the 27th of that month.

Dr. Codrington, on my bringing the point to his notice, has most kindly supplied the information given below, which enables the difficulty to be cleared up. The quotations are from Mr. Beveridge's translation of the Akbarnáma in the Bibliotheca Indica, 1904, Fas. 1, Part 2.

Page 22. 'It appears that eras were framed upon some great event, such as the appearance of an established religion or the acquisition of a great kingdom. . . . But if your Majesty directs that the new era commence from the day of your seating yourself on the throne of sovereignty, . . . assuredly such a good deed will be at once a mark of thanksgiving and a fulfilment of the wishes of mankind.'

Page 23. 'The repeated representations of this body of men, and a regard for their petitions prevailed, and were accepted, and an order was issued that the New Year which followed close on the year of the accession should be the foundation of the Divine era.'

Page 33. 'Inasmuch as the wise of the past and the present are agreed that whenever some glorious event is made the foundation of an era, the latter should begin from the proximate New Year, without regard to a discrepancy either in previousness or in lateness; the sundry days before the New Year were reckoned as included in the New Year, and the latter was made the beginning of the Divine era. Accordingly this has been recorded in the proclamation which has been set forth above.'

Page 5. 'At that place, in a felicitous hour, to wit, near noon of Friday, which was, according to visibility, the 2nd of Rabiu-g-gani, 963, of the lunar year (Feb. 14, 1556), but, by calculation, the middle of the third (Feb. 15), . . . that glory of his lefty lineage put on his person a golden robe, and sate with good auspices and prestige on the dais of sovereignty and the throne of the Caliphate.'

Page 32. 'Twenty-five days after the auspicious time of the accession, viz. on Wednesday, 28th Rabíu-s-sání, 963, there was the world-illuminating New Year, and the Sultán of the East confronted Aries with his world-adorning banners.'

[Note by Mr. Beveridge.—It has been already stated that the accession took place on Friday, which was probably the 3rd Rabíu-s-sání, and now we have this supported by the statement that the New Year or 28th Rabíu-s-sání was twenty-five days after the accession. But if the 3rd was a Friday, then the 28th must have been a Tuesday, and not a Wednesday as here stated.]

From these quotations it is clear that the Ilahi era began on the Nauroz (i. e. the day following the vernal equinox—when the sun enters Aries) of the year 963 A. H., which, according to the Akbarnama, occurred on 28th Rabi'u-a-sani, but according to the Tabaqat-i-Akbari (Elliot and Dowson, vol. v, p. 247) on the 27th Rabi'u-a-sani. The latter also gives the 2nd Rabi'u-a-sani (not the 3rd) as the date of Akbar's accession (ibid., vol. v, p. 241), and this date is accepted by most authorities. Aba-1-fazl clearly states that the accession took place on a Friday, and Friday appears to have been the second day of the month. Twenty-five days after this would bring the Nauroz to the 27th. I have therefore followed the dates in the table on p. 246 of vol. v of Elliot and Dowson's History of India, which is given below.

				A	KBAI	3		
ILÁHÍ	YEAR					A. H.		
1		3			4	963	27	Rabf II
30				-		993	19	Rabf I
31			4		4	994	29	Rabí I
32						995	11	Rabí* II
33		76			-	996	22	77
34				+		997	4	Jumádá I
35						998	14	69
36						999	24	12
37		4				1000	5	Jumádá II
38				-	+	1001	17	
39			-			1002	28	27
40) .	4				1003	9	Rajab
41		+		,		1004	20	12

IL	HI YE.	AR					A. H.		
	42						1005	2	Sha'bán
	43				4		1006	13	91
	44				4	4	1007	23	79
	45		4				1008	4	Ramazán
	46		5	*			1009	15	22
	47	-				-	1010	26	22
	48				4	*	1011	6	Shawwal
	49				41		1012	17	21
	50	4.	4		+	-	1013	28	22

The Ilahi year contained the following months :-

1. Farward	in 5.	Amardád	9.	Ágar
2. Ardíbihi	sht 6.	Shahréwar	10.	Dí
3. Khúrdád	7.	Mihr	11.	Bahman
4. Tir	8.	Abán	12.	Isfandármuz

The following table, which Dr. G. P. Taylor has kindly prepared with the help of Elliot and Dowson's *History of India* and sent to me, shows the dates A. H. on which the regnal years of Jahángír commenced:—

	0	-		-				
REGNAL	YEAR					A. H.		
1				1.0		1014	11	Z'u-l-q'ada
2		4				1015	22	9
3			-		-	1016	2	Z'u-l-hijja
4						1017	14	21
5				-		1018	24	21
6						1020	6	Muharram
7				*	*	1021	17	
			47			1022	26	13
8							9	Safar
9		-0	*			1023		
10			4	*	-	1024	18	DINT
11					2	1025	1	Rabí I
12				+	+	1026	12	3)
13			0.			1027	23	. 9
14				4		1028	4	Rabí' II
15				-		1029	15	21
16						1030	27	19
17	-					1031	9	Jumádá I
18	-			-		1032	20	27
19		*	*			1033	29	**
20						1034	10	Jumádá II
21		4		7	*	1035	21	
				-			3	Rajab
.22	-		+	*		1036		*
						Test	CONTRACT OF	

Jahángír ascended the throne on 20th Jumádá II, 1014, and, as in the case of Akbar, the period before the first Nauroz was included in his first regnal year.

Jahángír died on 28th Safar, 1037.

The Hijra months are :-

1. Muharram	5. Jumádá I	9. Ramazán
2. Şafar	6. Jumádá II	10. Shawwal
3. Rabi I	7. Rajab	11. Z'u-l-q'ada
4. Rabí II	8. Shaban	12. Zu-l-hijja
